

# Agricultural Intervention in Mtwapa, Kenya

Kayla McAvoy (Management Information Systems), Jessica Ruggiero (Biology Pre-Physical Therapy), Trevor Shaw (Chemical Engineering), Lisa Mendez (Management Information Systems)

Advisors: Professor Jill Rulfs (Biology) & Helen Vassallo (Management)

#### **Abstract**

- Chronic food shortages<sup>1</sup>
- Two to four million people receive food aid<sup>2</sup>
- Different agricultural methods
  - Better crop production

# Background

- One of the largest growing coastal regions because of the attraction to the property market<sup>3</sup>
- People live mostly in middle and lower class families<sup>4</sup>
- Coastal Kenya is considered a fooddeficient region despite majority of the population investing in crop production for their livelihood<sup>2</sup>

## Need & Approach

Need: Methods that will not be affected by erratic rainfall, natural disasters, or produce any sort of harmful disease.<sup>1</sup>

Approach: Inform townspeople of new, effective agricultural methods.

#### Methods/Procedure:

- Creation of the informational brochure
- Research on what crops will grow and survive
- Introduce new agricultural methods
- Crops include:
  - Maize
  - Sweet Potatoes
  - Cashews

# Results

- Informational brochure
- Educating the townspeople of new agricultural methods
- More job opportunities
- Healthier Children

### Conclusions

- More effective crops lead to
  - Productive farms
  - Stimulus of the economy
- More export and trade opportunity
- Education of the community (crops and farming techniques)
- Cycle of education, farming & money

# Acknowledgments

Special thanks to Rebecca Ziino for her time and teaching us all about research related information. Also, Jes Caron and Jim Monaco for their time and help.
