

DESIGN OF AN AUTONOMOUS PLATFORM FOR SEARCH AND RESCUE UAV NETWORKS

Group Members:

Catherine Coleman, RBE/ME

Joseph Funk, ECE

James Salvati, RBE/ECE

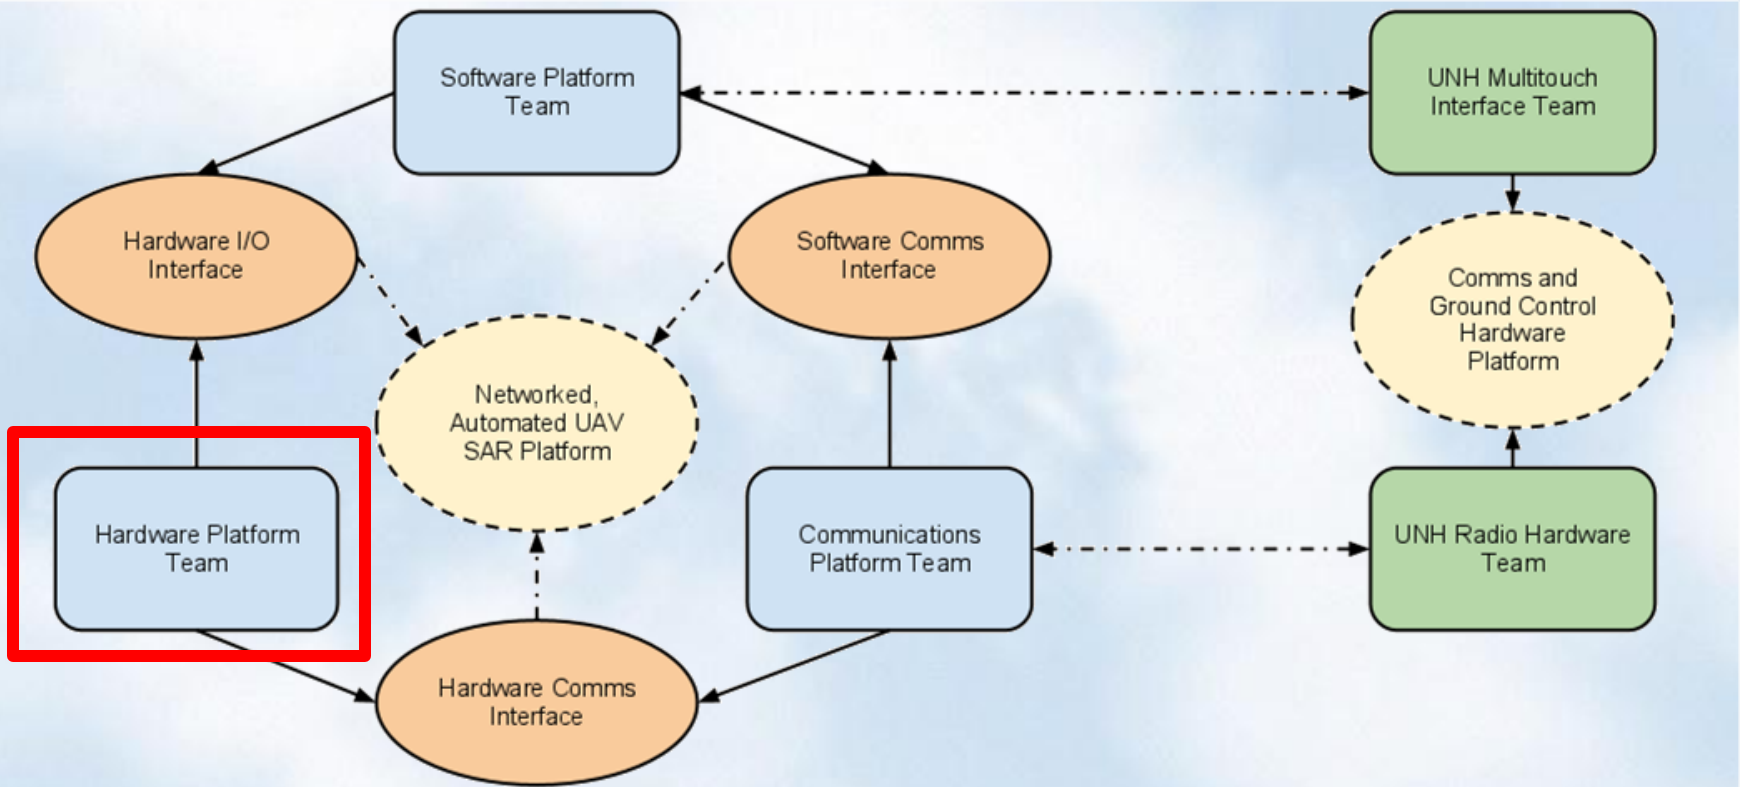

Christopher Whipple, RBE

Advisors:

Professor Padir

Professor Wyglinski

"A Search and Rescue volunteer who has completed our Academy will have over 220 hours of Search training prior to responding to missions."

San Diego County Sheriff's Department

Design Specs

"Goose"

"Blue Jay"

"Red Robin"

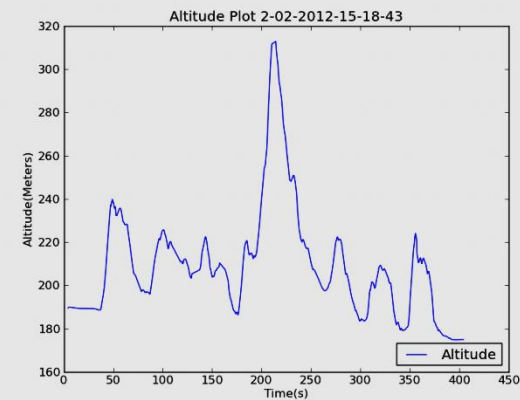

"Duck"

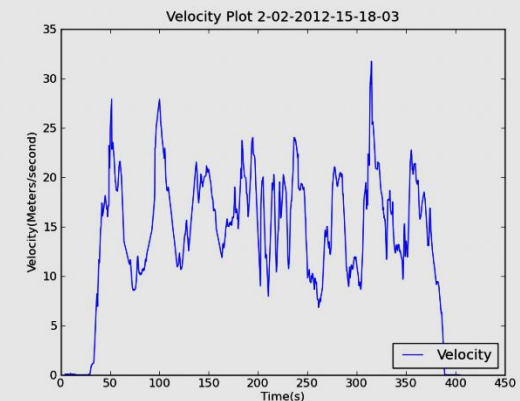

Layout

Flight Results

Altitude Plot

Velocity Plot

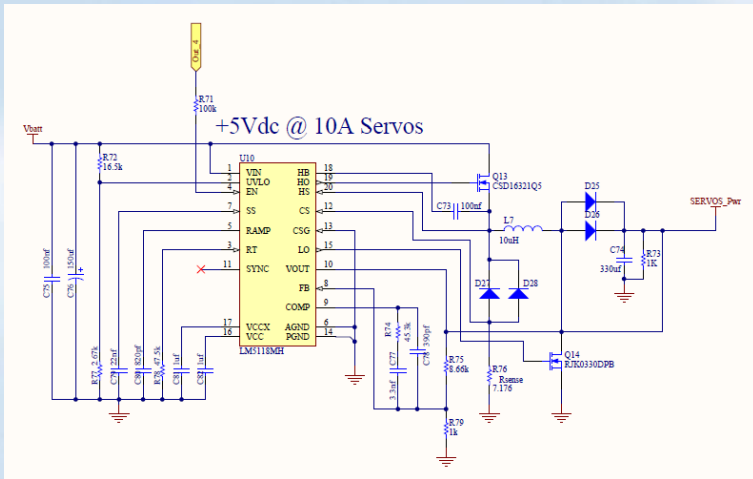

Image with Dampening

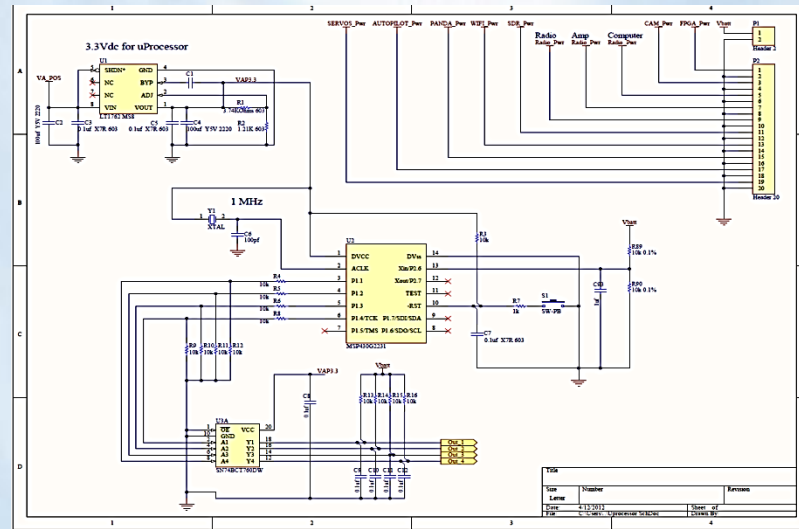

Images without Dampening

- MSP control logic
- Initial estimates between 90-95% efficient
- Flexible battery input

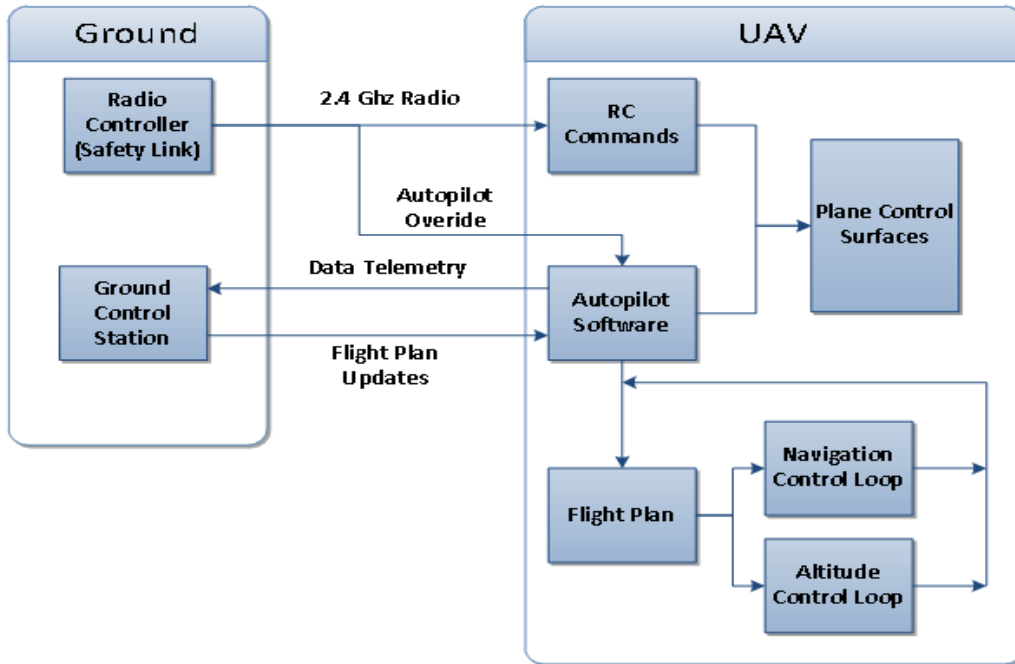

System	Voltage	Current	Allowed Power	Priority level*
FPGA Power	5 V	5 A	25 W	4
Camera	6 V	.5 A	3 W	4
SDR Amplifier and Computer	5 V	4 A	20 W	3
SDR	6 V	3 A	18 W	3
WIFI	15 V	.8 A	12 W	2
Panda	5 V	1 A	5 W	2
Autopilot System	8 V	.5 A	4 W	1
Servos	5 V	3 A	15 W	1
Total			102 W	

Regulator Circuit

Control Logic

Paparazzi Autopilot System

- Ground Control Station (UI)
- Radio Control Manual Override
- Incremental Testing
 - Auto 1
 - Auto 2
- Radio Telemetry
- Multi Plane Connection

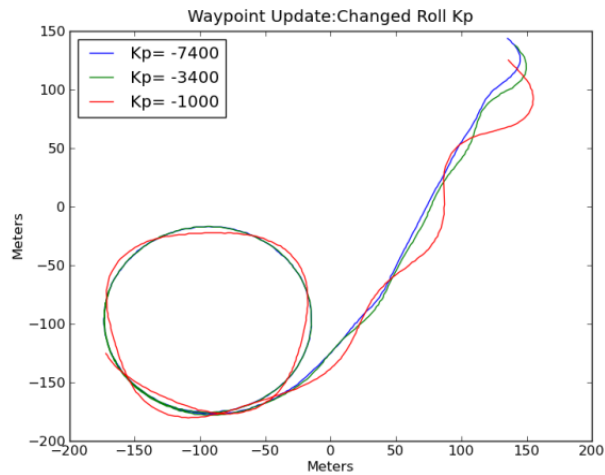

Roll Navigation Simulation

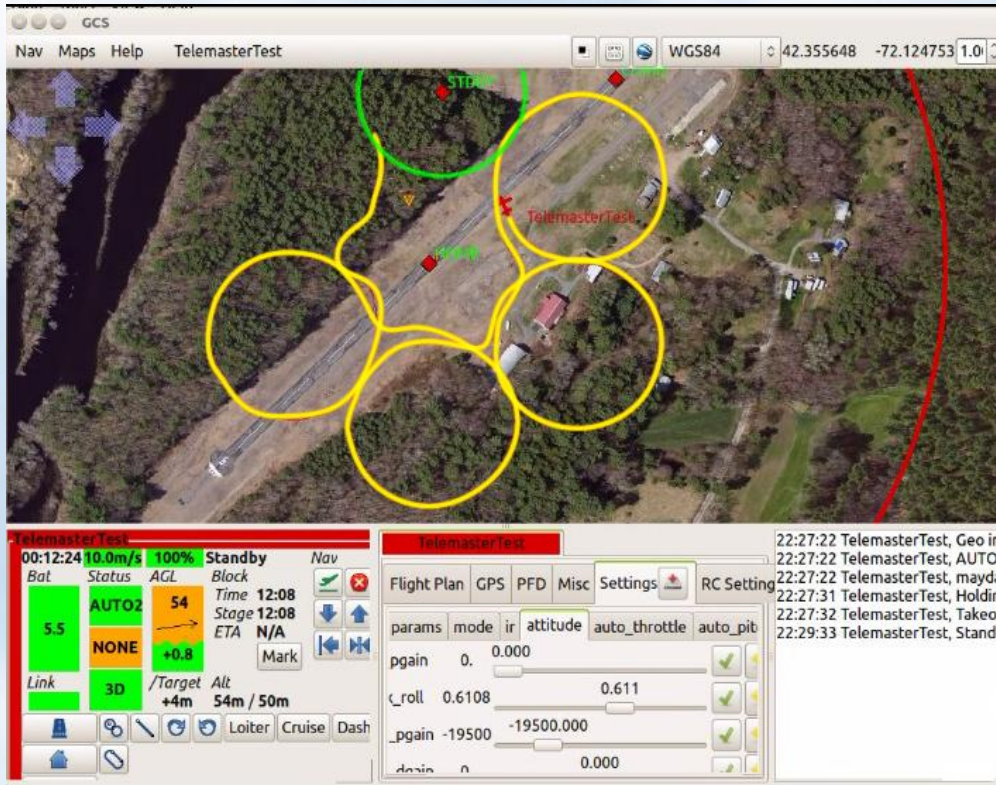

Launch Altitude Simulation

- Sensor Configuration
- Data Acquisition
- 2 Manual Mode Flights
- 1 Auto 1 Engagement
- Multi-board Connection

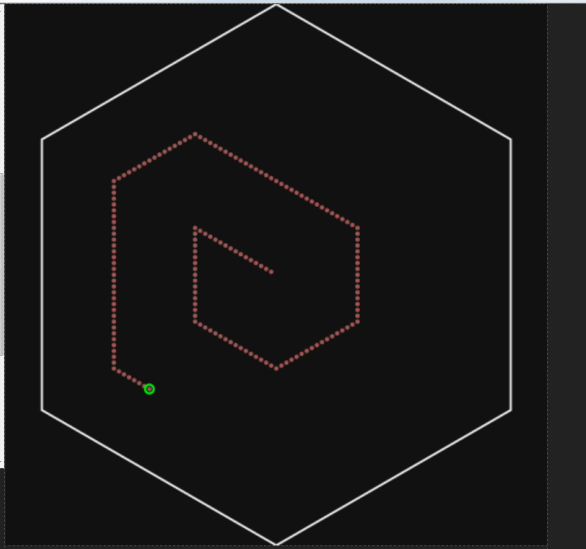

Waypoint Insertion

D	Goal	Outcomes	Resulting Changes
Nov 13	Robin RC Flight	-Engine stalled in final flight, planes steered right	-Altered engine mount thrust angles and pressure gas tank -Moved the gas tank back 4 inches
Feb 2	Robin RC Flight	-Successful GPS downlink -Wings shifted and sheered off wing struts connection	-Added Aluminum Frame and hard mount point for wings -Mounted the IR sensors
Feb 9	RC Flight Decoder Board	-Calibrated thermo sensors on plane	-Replaced the broken wheel
Feb 15	Auto 1	-Lost the down link before going into Auto 1	-Added New decoder board
Feb 18	Auto 2	-Caught a cross wind and crashed	-Fixed all crash damage, replaced glue on tail and installed the dome
Apr 7	Jay Flight Auto 1/2	- Too windy, taxi test only	-NA
Apr 11	Jay Flight Auto 1/2	-Jay flew, slight warp in right wing discovered -Only half of Robin returned	- to be continued.....

Planes in Action

Design of an Autonomous Platform for Search and Rescue UAV Networks

Catherine Coleman, Joeseeph Funk, James Salvati, Chris Whipple
Advisors: Taskin Padir, Alexander Wyglinski

WPI Robotics

- **Robin**
 - RC flight
 - Auto 1 flight
 - Crash, need airframe replacement
- **Jay**
 - RC flight
- **Duck**
 - Some assembly required
- **Integration**
 - External waypoint insertion
 - Power board designed

New England Undergraduate
Computing Symposium 2012

PROJECT WIND WOULD LIKE TO GIVE A SPECIAL THANKS TO:

The MathWorks Inc.
Tanner Hiller Airport
