

Little Sun's Solar Lamp

- Uses solar power
- Replaces hazardous kerosene lamps

SolarSack

- Removes bacteria in water using solar energy
- Gives communities better access to safe drinking water

Unmute

- Created out of recycled fishing nets
- Initially designed as three separate pieces → final product is one component

Careturner

- Universal design
- Used recyclable aluminum rather than painted steel

Reduce, Reuse, Recycle

Rethink Sustainability.

Simplify every step of the process

Minimum Viable Solutions

- Decrease material usage
- Reduce carbon footprint
- Support clients goals

"MVP is, at its core, a sustainable way of thinking. It explains that you should only do what you need to do." - Jens Peter

Hydro Hull Cleaning

- Preserves ecosystem by limiting cross-contamination
- Reduces fuel consumption by increasing the hull's hydrodynamics

- Fully electrical hull cleaning ROV and surface setup
- Replaces live divers as shown on left
