WORCESTER POLYTECHNIC INSTITUTE

COL. FURLONG SPEAKS ON AFRICAN AREA

Student Opinions On Controversial Subject Gathered by Tech "News"

Last Wednesday, November 7, Colonel Charles Wellington Furlong, noted Intelligence officer, gave his talk entitled "Africa, Continent of Destiny". In his own interesting manner he described the country and its importance to future security. He also discussed the subject of the recent Zionist movement in Palestine and of the resulting attitude of the Near East toward the Western powers.

As Colonel Furlong pointed out, control of Africa means possession of Gibraltar, gateway to Southern Europe; the Suez Canal, shortest route from Europe to the Far East; and the Cape of Good Hope, key-point for trade between Southwestern Africa and the Far East.

Russia is going all-out for control of this country, not only for possession of these important gateways mentioned, but also for the vast amount of untapped resources, including the much-desired uranium deposits. Russia would also like to get possession of Dakar on the West Coast, a port which is as close to the U.S. as any of the European "jump off" spots. Colonel Furlong, at this point, brought out the fact that the Western powers are doing very little in the way of getting in good stead with the Near Eastern countries. We must if Russia is to be kept from over-running this key-stone to world conquest.

At the present moment Nahas Pasha is stirring up his people against the British and there is danger of a revolution, stated Col. Furlong. With regard to the Palestinian situation in which a million-and-a-half Moslems were driven from their homes so that the Zionists might migrate back to Palestine, Colonel Furlong stated that these immigrants actually had no rightful claim on the land since they were of Russian and Balkan descent.

This controversial issue was investigated by the TECH NEWS, foreign students being contacted and their opinions noted. These views on the matter are stated in the following paragraphs.

Concerning the Arabian situation, it has been brought up that during the First World War promises were made for Arabia's independence, if she would revolt against Turkey so as to relieve pressure on the battle lines in France. Arabia revolted, and the war was won; but the British government did not adhere to its promise.

These incidences plus the facts See COL. FURLONG—Page 2

Tech Station Installed

Signal Corps Unit To Have Course in Radio Operation

A recent edition of a local newspaper contained an article about a Worcester mother who has the great pleasure of listening to her son speak every day even though he is 1600 miles away. The son, chief engineer for a 10,000 watt radio station in Puerto Rico, makes this daily contact with his mother through the help of local amateur radio operators. The "free call" setup is carried on by the son's holding conversations by short wave with hams in the Worcester area while the mother listens in on her receiving set, which is not capable of sending messages.

The sending and receiving station of one of the aforementioned area "hams" is located on the third floor of Jennings House, 18 Boynton Street. All of the frosh and a few sophs will recognize this address as the headquarters of the Military Science Department of the campus Signal Corps unit of the R. O. T. C. The "ham" is none other than SFC John Gregal, who, along with 1st Lt. David Edwards, compose the staff of two licensed operators of Tech's own radio station with call letters KIWAR.

For all who may have seen it on the roof of Jennings House, that complicated arrangement is a rotary beams antenna for 2 and 10 meter band short wave. On the floor below, there is a VHF 152, a converter for receiving on the 2, 6, and 10 meter band, and a RME 69 receiver. Coupled with this receiving equipment are a 150 watt transmitter for the 10 meter band, and a 15 watt transmitter for the 2 meter band, which compose the sending equipment. With this setup the station travels on the air waves to places all over the western and eastern hemispheres, and Lt. Col. James Foster, head of the Military Science Department, graciously extends an invitation to all students who are licensed operators to use the equipment at any time.

Tentative plans have already been formulated for a course of instruction for students leading to a novice's license (of one year's duration) which will enable the student to use the equipment for sending and receiving. The only thing holding the plans back is the present shortage of equipment. However, this bugaboo is to be remedied in the near future and the course of instruction will begin rolling in high gear.

TWELVE SENIORS HONORED BY ELECTION TO WHO'S WHO

Faculty Representative Confirms Selections Made By Tech Council

The election of Seniors to *WHO'S WHO IN AMERICAN COLLEGES AND UNIVERSITIES* has been completed and the results of the election announced by the Tech Council. The Tech Council nominates and elects twelve Seniors for this honor, and a representative of the faculty confirms the selections.

Each year the campus leaders and active men throughout the colleges in the United States are selected for this honor. The following men will represent Worcester Tech this year:

Harold Althen—Track "W" 1, 2, 3; Basketball 1, 2; Tech Council 1, 2, 3, 4; Skull 3, 4; Tau Beta Pi 3, 4; Class President 1, 3, 4; A.S.M.E. 4; Paddle Rush 1, 2; Rope Pull 1, 2; Fraternity President 3; Phi Sigma Kappa.

Robert Chapman—Basketball 1, "W" 2, 3, 4; W.P.I.A.A. 4; *Peddler* Staff 1; Paddle Rush 1; Rope Pull 1; Interfraternity Sports 1, 2; Skull 4; Class Treasurer 3, 4; Sigma Alpha Epsilon.

Frank Flood—Football 1, 2; Baseball 2, 3, 4 (Manager); Prom Committee 3; Tech Council 3, 4; A.S.C.E. 2 (Treasurer), 3, 4 (Vice-Pres.); Interfraternity Council 4; *Peddler* Staff 1, 2, 3, 4 (Managing Editor); Paddle Rush 1; Rope Pull 1, 2; W.P.I.A.A. 1, 2, 3, 4; Pi Delta Epsilon 3, 4 (Pres.); Interfraternity Sports; Fraternity Vice-President; Phi Sigma Kappa.

Alan Hansen—Football "W" 1, 2, 3 (Co-Capt.), 4; Skull 4; A.I.E.E. 2, 3, 4; W.P.I.A.A. 3 (Vice-Pres.); Rope Pull 1, 2; Interfraternity Sports 1, 2, 3, 4; Sigma Phi Epsilon.

Joseph Jinnies—Football "W" 1, 2, 3, 4 (Co-Capt.); Baseball 1; Basketball 1, 2; Skull 3, 4; A.I.Ch.E. 2, 3, 4; W.P.I.A.A. 1, 2, 3, 4; Varsity Club 3, 4 (Vice-Pres.); Interfraternity Sports; Tech Council 3, 4; Sigma Phi Epsilon.

William Mehalick—Football "W" 1, 2, 3, 4; Basketball "W" 1, 2, 3, 4; Athletic Council 3; Prom Committee 3; Skull 3, 4; A.S.M.E. 2, 4; Tech Council 2; Newman Club 1, 2, 3, 4; Interfraternity Sports; Theta Kappa Phi.

Warren Palmer—Track 1, "W" 2, 3, 4; Soccer "W" 2, 3, 4 (Co-Capt.); Tech Council 1, 3; Skull 4; A.I.E.E. 2; W.P.I.A.A. 1, 2, 3, 4; Rope Pull 1; Class Vice-President 1, 3, 4; Varsity Club 4 (Treas.); Athletic Council 3 (Treas.), 4 (Pres.); Interfraternity Sports; Fraternity Vice-President 3; Sigma Phi Epsilon.

Edward Samolis—TECH NEWS 1, 2, 3 (Editor-in-Chief), 4; Tech Council 3, 4; Skull 4; Tau Beta Pi See WHO'S WHO—Page 4

Frosh - Sophs Prepare For Tech Carnival

Competition Keen As Both Classes Vie For Goat's Head Honors

During the few weeks that classes have been underway, we have witnessed the pounding of paddles, splashing of muddy water, and either participated in or heard of long walks on cold nights. The cause of all this, of course, is the highly contested Goat's Head, which needs no further explanation.

The time is coming, however, when brawn and speed will be of no avail. This Friday evening, Nov. 16, at eight o'clock in Alden Memorial the annual Tech Carnival, sponsored by the W. P. I. Student Christian Association will be held. Henry Shapiro is general chairman. The Carnival consists of skits by the Faculty and Freshman and Sophomore classes. The winning class receives one point towards attaining the Goat's Head.

The respective class humorists have already compiled "scads" of script. Ken Wakeen, Freshman chairman, declares, "We have the wit, cast and a five point lead in the race and by next Friday at ten o'clock we'll have six points. The Sophomore's Roy Wise retaliates, "Martin and Lewis should be as good as '54."

Not to be disregarded, however, is the Faculty's Sam Levenson, Mr. E. Hollows, who will try to prove that a man is only as young as he feels and that he can still show the youngsters what real comedy is. A film will be part of the faculty presentation.

All in all, it looks like a real "bang up" three ring circus. If you want to have the time of your life be in Alden Memorial at eight o'clock this Friday night.

The price is \$1.00 per couple, \$0.75 single. Dancing will follow in Alden Memorial to the music of the ever-popular Boyntonians.

Seniors! Seniors!

ALL MUST HAVE PEDDLER PICTURES TAKEN AND RETURNED BEFORE DEC. 1. MAKE APPOINTMENTS AT BUSHONG'S.

Ken Reeves To Play At I.F. Formal To Be Held on Dec. 14

Varied Program Planned With Ticket Sale To Start in Near Future

December 14 is quickly descending upon us so that it is time for everyone to give some real thought to the coming Interfraternity Ball. This, the first formal weekend of the school year, is open to all and it is hoped that the freshmen especially will take advantage of the occasion to really get the most out of college activities. Dancing will be held this year from 9 to 2 o'clock in Alden with music provided by Ken Reeves. Ken, by the way, played at last year's I. F. formal and proved well-liked. Although tuxedos will be the dominating dress, the members of the Signal Corps unit here at Tech are reminded that R. O. T. C. uniforms will be considered as proper for the occasion. On the evening of the formal the receiving line will be made up of Col. Foster and Mrs. Foster, Col. Harris and Mrs. Harris, and Admiral Cluverius.

The 1951 version of the I. F. Ball will be rather unique in that some really special entertainment will be on tap for intermission. Five members of the Boyntonians have been contacted and have consented to give out with some solid Dixieland Jazz for all to enjoy. This session will take place in the Sanford Riley Commons where in addition refreshments of cokes and coffee will be served.

The remainder of the weekend will be taken up with the school's basketball game and house parties. With the cooperation and backing of seniors and freshmen alike, the formal will be nothing short of terrific. Tickets for the prom will be on sale soon.

COL. FURLONG—From Page 1

that the enemies of the Allies during the last World War have received more money for relief than all of the Near East, and also the fact that homeless Arabians are receiving \$200,000 as compared to \$300,000,000 received by the Israeli, leave the Near East with no reasons for being thankful to the United States, Britain, or France.

The picture at the present moment looks dark, but there is still hope. One of the solutions presented by a student is included below.

Turkey is getting so much money at the present moment that she is the only link holding back the Russians. Communism was outlawed in the Near East by the

British and therefore, the people are just beginning to receive the propaganda of Russia. The educated people can already see through the Russian hoax. The solution to the problem then is to show how much better the West can be. A quick change of attitude by the Western Powers would help. There should be more respect and sympathy for these people. Those who deal with them should try to understand them and their problems and not first talk down to them. These, plus a few generous actions towards the people, would go a long way in showing that the West is more interested in the welfare of the Near East than Russia. All hope is not lost yet, but the time to act is now.

Masque Plans Formulated At Second Meeting

Acting Group to Present "Refund" at a Forthcoming General Assembly

The second Masque meeting of the year was called to order at 4:15 o'clock in the Janet Earle Room by Joe Lojewski, President. There was a quorum present and the first business discussed was the new one act play. John Leech, the student director, made a selection of a play called, "Refund."

This play concerns an alumnus of a prep school who, after so many years, decides that he wants his tuition back because he feels that he didn't learn a thing. The masters at the school try to convince him that he really has picked up some knowledge, and they even give him a quiz to prove it to him. They finally succeed in convincing him that he has benefited from his stay at the institute, and get to keep his tuition. This play promises to be very amusing, and all will have no trouble in drawing some analogies to life at Tech.

The Masque presentations at general assemblies have always proved popular; these assemblies have ranked with the best. Acclaim must be given the group for the effort and extra work put into these short plays.

The Masque badly needs some acting talent and even one who is vaguely interested in acting is invited to the tryouts, which are Tuesday night, November thirteenth, on the Alden stage at 7:00 P.M. The date set for this one act production is December twelfth, at a regular assembly period.

The remainder of the meeting was devoted to routine business. Two new sophomore members were voted into active membership, they are Dave Hoyle and Pete Becker. The members were asked to start thinking about the major production, which isn't too far off.

The members were reminded that if they wish to remain active they should attend three-quarters of the regular meetings. The meeting was then adjourned, but before everyone left Joe Lojewski read the closing line of the play, which ran, "And our proudest boast is that no pupil at this school can possibly fail."

AROUND THE GREEK CIRCUIT

By AL BAFARO

Phi Gamma Delta

For the past two weekends Phi Gamma Delta has been quiet and studious, cognizant of the loss of study time due to rushing. A few of the brothers who were more efficient with their work took these opportunities to visit parties at our chapters at Amherst and M.I.T. Plans are now under way for having a combined party with our nine New England chapters.

After the football game on Saturday, some of the Fijis are heading for a mountain cabin near Middlebury, Vermont. The purpose is a mountain climb but optimists are waxing skis!

Phi Sigma Kappa

As the lodge brothers comfortably recuperate from the hectic weeks of Rushing, another party approaches the doors of 11 Dean Street. A big weekend party is planned, with the Tech Carnival the major attraction. The house will be open Friday, Saturday, and Sunday for the girls. Everyone down here sure can use that long week-end before this shindig.

The Brothers of Phi Sig have begun a new club, dedicating Friday evenings as a social occasion. This organization makes innocent Becker women wince with fear as they await the next visit of our socialites.

The right hand of fellowship is out at Phi Sig for Bob Paine, a new member of the Chemistry department at Tech, and a pledge down here. Likeable Bob has made many friends during his short time on the hill.

And one more thing—eight sophomores have switched to the Civil course after checking Don Furlong's new rod-man, one Carol Bruffee. This novice and unprecedented act stopped the music in at least one Civil course which was in session at the time. Hold 'er plumb, Don.

Sigma Alpha Epsilon

Taking time out from the books and the rigors of the current rushing season, the SAE's turned their attention to the proper disposal of the much-revered corpse of Paddy Mur-

phy during the week-end before last. Paddy's wake and funeral attracted a large following, and his subsequent burial in Institute Pond was truly fitting—Pat was wet in death as he was wet throughout his life. Our only regret is that an honored member of Worcester's police department did not seem properly respectful of poor Patrick, and as a result Pat's progress through the city was momentarily interrupted. All's well that ends well, however, and Paddy now rests in peace for another year.

This past weekend the brothers attended the Tech-Norwich game, and followed it up with a Saturday evening dancing party at the house. Some men made the trek home over the long week-end, perhaps to get in advance bids for dates to the coming I. F. Ball.

More immediate attention is being given to this coming weekend, when the annual Singapore Sling is to be held. With the transforming of the game room into a waterfront cafe, and all the brothers and their dates dressed as waterfront "characters", this party is always one of the highlights of the social season.

Lambda Chi Alpha

What a week-end! With the gang down from our chapter at Norwich, everything turned out upside down and inside out. The brothers arrived on Friday and stayed over until Sunday. After that, things got around to normal. Saturday was spent watching the last game of the year in the afternoon and having a big get-together in the evening to renew old acquaintances and to make new ones. We at LXA are very close to our chapter at Norwich after having installed them as a chapter two years ago.

Besides a big week-end we also had another big event in the announcement of a future Lambda Chi. "Papa" Kulmacz passed out cigars on the birth of his son, Richard. This in turn started a future romance between Ed's son and Bill Mahota's daughter. Congratulations Ed and Ruth.

Theta Kappa Phi

Theta Kap was the scene of an-

other bangup house party Saturday night, with the illustrious Paul Seibold and wife as chaperones. The biggest hit of the evening, naturally, was Dud DeCarli's world famous punch—"Knickerbocker Tankard." Of course, he had to get up at three A.M. Saturday morning to start the preliminary operations in the production of this fabulous brew. By working hard, and keeping at it, he had it ready for 10:00 P.M., and the eager guests at the party.

The scandal mongers will have it that Al Bafaro is well down that famous rocky road. The latest report is that he will lose his pin to Joan Virgillio sometime during the formal weekend. Brother Bill Mehalick doesn't wait for any such auspicious occasion to hang his pin. He pinned Holly a short while ago. Congratulations, Bill.

The newest member of Theta Kappa Phi was only a few short days ago a homeless waif. He found his way into our house sometime during the early morning hours last Friday. He immediately won the hearts of everyone, and is now one of the most popular residents in the house. You really ought to meet our new kitten, Li'l Lambda.

Theta Chi

Six men were placed in the ranks of Theta Chi when Al King, Bob Mahon, Nasuh Malas, Bob Morehardt, Art Nichols, and Ed Prantis were initiated here last week. Welcome Brothers.

Speaking of brothers, the old and the new will be gathered here Nov. 17 for its annual Thanksgiving Stag Banquet. It promises to be the usual gourmet's delight, and from the alumni responses to the invitations, they seem to think so too.

The halls of 85 Salisbury St. are again echoing to the refrain of Sammy Kaye's "Dear Little Girl of Theta Chi" as the octet rehearses for a recording date and gets warmed up for the Song Fest.

This week the juniors will take on the rest of the house in a football tilt which undoubtedly will prove to be completely unrehearsed, to say the least.

GOAT'S HEAD SHOWN DURING ROTC DRILL

When Vinnie DeFalco and a host of sophomores flaunted the bronze goat on the steps of Sanford Riley recently, few of the newcomers to W.P.I. left the House of Rochette to do battle. At this time, the class of '54 resolved to make a more daring display of the trophy. This they did on Saturday, November 10, during the ROTC drill on the baseball field.

During the drill, three sophomores, Otto Wahlrab, Hank Boynton, and Paul Alasso, wandered on to the field and displayed the Goat's Head for a full ten minutes. The Frosh, standing at attention, looked on with frustration. Finally one of the platoon leaders gave the command to break ranks, and the infuriated 55'ers swarmed upon the coveted goat, only to be denied once more as the trophy was tossed over the Park Avenue fence and to safety.

Mind Over Matter

The assembly planned for Nov. 14 promises to be as spectacular and amusing a program as you'll ever hope to see. At this time, Dr. Henry Gerald, mentalist and scientist, will treat the subject, "Mind Over Matter". Some of the upperclassmen may well remember Dr. Gerald and his lovely assistant from his visit here two years ago and will recall the sensation he created at that time. Once again this year, the Doctor will run through his astounding experiments on mental telepathy and mysticism. Audience participation is a part of his act. He will include the art of hypnotism on the program if those in the audience so request it. His various demonstrations have proved to be most amazing and hilarious.

Horsemen Humble Engineers 26 To 20

Zeleny Shatters Cross Country Mark But Harriers Bow 26-21

Team 3 and 3 On Season as Dick and Ron End Careers

Dick Zeleny, ace of Tech's cross country for the past four seasons, brought his brilliant career to a close last Friday by setting a new Tech course record. Dick covered the 3.7 mile grind in 18:12 which was six seconds better than the record set by Bill Johnson of Providence College in 1950.

However, a well balanced Tufts team defeated the Tech harriers by a score of 26-31, to even the Engineers record at 3 wins and 3 losses.

Trailing Zeleny was Tech's Don Post. Then the Jumbos took the next six out of seven places which was enough to give them a victory. Post, like Zeleny, also ran the best race of his career. Don covered the course in 18:45 and he is the only other Tech runner to ever break 19 minutes for the course. As Don is only a Junior, he will be back next year to try to better this mark, and with another year's experience he should be able to do this very easily.

The third Tech runner to finish was Capt. Ronnie Thompson. Ronnie also had his best day in his four

seasons of cross country. His time was 19:25 which was the course record until Zeleny broke it in his Freshman year. Ronnie, a strong runner, got better with every meet, and his progress with the team is one of which he and the team can be proud. He and Zeleny are the only seniors on the squad and their absence will be sorely missed next season.

Zeleny, the 20 year old flash from Nutley, New Jersey, has compiled a tremendous record in his four years at Tech. He lost two meets in each of his first two years, and in the past two seasons he has lost only once each year. As well as holding the Tech record, he holds records at the University of Massachusetts and Amherst College. Since Dick is not entered in the New England Cross Country meet he has completed a career which is better than any cross country runner has ever established at Tech and it will be a fine standard in which future runners may hope to strive for.

Coach Frank Sannella was pleased at the showing his team made this season and will be looking forward to the relay season which will start after the Thanksgiving recess.

Tech Booters Close Season With 2-2 Tie

Also Lose 2-1 at B.U.; Nine Seniors in Final Game Against M.I.T.

In their final game of the season, the Worcester Tech soccer team battled it out with their rivals from MIT last Saturday to a 2-2 tie. Tech took every advantage in trying to break the deadlock which lasted all through the fourth period but was unsuccessful in all attempts.

Willard opened the Tech scoring at the end of the first period on a penalty kick. A rather unusual thing about it was that Willard's position is left-fullback and they rarely score goals. Tech's second goal was made by Beach in the second period, when Sauer, MIT's goalie, dropped the ball.

Everything would have been fine but MIT's strong club scored soon after, when Saraga capitalized on a penalty kick against Tech. MIT's second goal came in the third period as Echard, replacement outside-right, scored even though three Tech men tried to "tie him up". Both teams went scoreless in the fourth period. Tech tried at least four times with kicks from the sidelines, but Sauer blocked all attempts.

The Tech team was keenly disappointed because the game did not go into overtime and they demonstrated fine spirit in wanting to play it out, but the coaches declined to do so.

The defensive standouts for Tech were Sealey and Corujo, who broke up many of the enemies' relentless attacks and played very hard games. The Tech seniors who played their last soccer game wearing the crimson colors, deserve much credit as the mainstays of the team. They are Captain Warren Palmer, Gordon Willard, "Shorty" Ellsworth, Al Foss, Don Adams, Dick Schmitt, Wayne Robertson, George Seidel, and Bob Lanou. These men have played many times without substitution and they and the other players are pleased to have had a successful season of two wins, two ties, and two losses under the coaching of Jim Geddes.

In their game with Boston University, this squad came out on the short end by 2-1, with Beach scoring the single Tech goal. It was Schmitt's last game as he injured his knee.

Lab Report Style: "Don't use hydrochloric acid for cleaning pipes. It eats the hell out of them."

HOLMES OUTSTANDING AS LATE RALLY FALLS SHORT

By MIKE ESSEX

What else can you say, except that it was a tough one to lose. Behind 20 to 7 midway in the third quarter, our Engineers pulled themselves together as they so often do and on the good right arm of Rollie St. Louis and the glue like fingers of brilliant Davey Holmes, they rallied to deadlock the score early in the fourth quarter. Not content with a tie, however, the Crimson and Gray then gambled and lost in an effort to pull it out. The final score thus read Norwich 26, Tech 20, and another season had come to a rather disappointing end.

Following an early Norwich threat neither team was able to sustain its offense and the game settled down to a punting duel between Shebek of Tech and Fisher of Norwich.

Then the Horsemen received a break when they recovered a fumbled punt on the Tech 41. Chuck Polsford then steamrollered around right end to the Tech 7, and on the following play Big Ed Meehan bootlegged it around the same side for a tally. Allard's conversion was good and Norwich led 7 to 0.

The Engineers took the ensuing kick-off but their attack stalled and Shebek was forced to punt. Three line smashes gained but eight yards and Fisher of the Horsemen dropped back to his 30 to punt. He never got it away as Ted Fritz smothered the attempt and Holmes picked up the loose ball on the 15 and went over standing up. Tommy O'Connor's placement was good and the score was 7 to 7.

The Vermont squad lost little time in moving out front again. Meehan highlighted the drive with a 26 yard aerial to Costin on 4. Passalacqua picked up two and then Meehan ran through right tackle for the score. Allard's kick was good and Norwich was once again ahead.

With time running out in the first half the Boynton Hillers took to the air in an effort to tie the score, but interceptions stopped two drives on the visitor's 25 and 30.

The Horsemen scored again early in the third quarter. Starting on their own 32 it was all Meehan as the giant quarterback made good on three out of four passing attempts, the last good for 22 yards to Costin in the end zone.

Things seemed to get worse as the Tech offense stalled and a low ebb was reached when Joe Jinnies' bad leg gave way as he attempted to pass from his own 10. Seconds later the disheartened crowd were on their feet when Rollie St. Louis in for the injured Jinnies, faded back and uncorked a tremendous pass. Davey Holmes gathered in the mighty heave on the Tech 45 and legged it all the way for the score. O'Connor's conversion was true and Tech was back in the ball game 14 to 20.

The Engineers suddenly had come to life and soon were on the move again. With the ball on the Tech 14, Saint hit Jackie Malloy with a bullet on the Tech 30 and the sophomore speedster raced to the Norwich 44. On second down, Saint faded back

again, passed to Holmes on the 35 and Davey sped to pay dirt unmolested. Here Lady Luck deserted the exuberant home team as O'Connor, given two chances, had both tie-breaking conversions partially blocked.

Once again in possession of the all, the Engineers refused to settle for a tie and it cost them the ball game. With a first down on his own 20, Saint elected to pass. The ball was intercepted and brought back to the 22. Three ground plays gained 9 yards and with the Tech defenses pulled in expecting a power smash, Meehan fired a touchdown pass to Pulsford. That was the ball game and it did not matter that the subsequent point after was missed.

The Engineers tried desperately for the equalizer in the remaining minutes but were unable to muster a serious threat.

The Engineers finished the season with 4 wins and 2 losses, their best record since 1943. Coaches Pritchard and McNulty rate a big hand for a job well done. Holmes, Hansen, Jinnies and St. Louis were standouts for Tech. Six seniors played their final game yesterday. They were Co-captains Joe Jinnies and Ed Majewski, along with Al Hansen, Rollie St. Louis, Bill Mehalick, and John Feldsine.

RUMORS END AS AChERS AND IHEE MEET

Irritated by insidious accusations, the two social societies on the hill held their first meetings of the school year on Friday evening, Nov. 2. Both of the colorful organizations were quick in issuing a formal rebuttal of the rumors that they had been decadent since the conclusion of their social successes of the previous year.

The outstanding business conducted by the AChERS was the formal pledging of Don Quimby. Don becomes the twelfth chem engine to have this, the highest of high honors, bestowed upon him. The AChERS having lost their Headacher and a goodly portion of his executive council, spent considerable time discussing the electing of new officers to

fill these exalted vacated positions. Charles Hedenstad, pioneering member who left this campus to colonize AChERS chapters in the fruitful southwest, was sent the first link of an official chain letter which will be circulated to all AChERS alumni and finally returned to the active undergraduate chapter here at Tech.

The formal issuance from the high command of the IHEE showed that, likewise, pledging was one of the main topics of discussion. Lacking a sufficient number of members to do business, however, they were unable to announce the names of the possible chosen few they plan to initiate into the senior drinking society on the hill. While the members present delved deep into the business at hand, minus the guiding hand of president Al Hansen and additional IHEE's to make definite decisions, they could

not allow their unfinished business to be passed on to the general public.

For engineers who like challenging work

Meeting this country's civilian and military production needs is providing an endless variety of problems to challenge the best of engineering brains.

Here at Western Electric, as in all big manufacturing concerns, the job calls for the pooling of special skills by mechanical, electrical, industrial, chemical, metallurgical and other engineers—to come up with the right answers.

The primary job at Western Electric—the manufacturing unit of the Bell System—is to make the thousands of kinds of telephone equipment needed to keep this country's telephone service going and growing. Many of these products are so tiny or so unbelievably complex—calling for such precision—that you'd think they could be made only by skilled technicians working under closely controlled laboratory conditions. Yet Western Electric engineers devise machines and techniques which enable workers,

after a short training period, to turn these things out under factory conditions. There's a real kick in doing work like that!

And, because of the specialized experience gained in our regular telephone job, Western Electric is also working on many important communications and electronic equipment projects for the Armed Forces. Such things as radar fire control systems for the Navy's biggest guns and for anti-aircraft guns—radar bombing systems for America's largest planes—multi-channel radio sets for all types of military aircraft—electronic marvels to launch, guide, and explode the latest guided missiles—provide opportunities galore for creative production planning.

Both of Western Electric's jobs—telephone and military—are vital to this country's present and future strength. Both are filled with challenges for the best engineers of today and tomorrow.
