## Tech Drops Close Decision Loses 9-8 to Northeastern Ending Ninth Inning Rally

Raslavsky Strikes Out Nine  
As Shaky Support Causes  
Initial Loss of Year

### RUSHTON HITS FOUR

Future Prospects Bright For  
Balanced Team; Closes Sea-  
son With Four Wins

Worcester Tech dropped a 9-8 decision to Northeastern last Saturday at Huntington Field, Brookline, following a closely contested game.

After a scoreless first inning, the Engineers broke into the scoring column by tallying twice in the second inning. This scoring was the result of Rushton's single, an error by Meehan, a single by Messimer. Rook's homer, a terrific clout to left center, gave Northeastern their only tally in the second. Gustafson's triple and singles by Raslavsky and Rushton gave the Engineers two more runs in the third. Northeastern was held scoreless in the third, but managed to score once in the fourth.

In a hectic fifth inning Northeastern ran wild tallying six times. Raslavsky, Tech's ace pitcher, pitched good ball until this inning. However, he weakened in this inning allowing five hits, one of them a double with the bases loaded. During this frame the entire team turned in a miserable exhibition of teamwork, the worst seen this year.

The Techmen got back in the ball game by scoring twice in the seventh on Raslavsky's and Rushton's singles and Forkey's long triple to left center. Trailing by two runs in the ninth, the Engineers rallied and tied the score. Wingardner's single followed by Raslavsky's and Rushton's fourth hits of the game gave Tech its first run. At this point of the game Harvey replaced Rushton on the base paths and Forkey sacrificed, putting Harvey and Raslavsky in scoring position. Bodreau's long fly to left scored Raslavsky with the tying run. Rook who had been playing third for the Huskies then took over the mound duties and ended the inning by forcing Korolyshun to fly to right field.

Northeastern scored an unearned run to win the ball game in the ninth. Driscoll who had just gone in to play short booted Meehan's grounder, Meehan getting to second on the error. He then reached third on a passed ball. Raslavsky bore down and struck out Callahan, but the winning run scored when Rook's attempted bunt cleared Korolyshun's head when he came charging in on the play. This is the first defeat Raslavsky has suffered this year. This defeat closed the season with a total of four victories and four defeats. With the exception of Captain Casey no one on the squad will be lost by graduation.

## Soph Hop Held At Worcester Country Club

Ken Reeves' Rhythm Band  
Plays For Enjoyable  
Spring Dance Fete

It is all over now! You're too late, for the Soph Hop, one of the important features of Tech's social season, ended at the stroke of two on Friday. Amid the scenic surroundings of the Worcester Country Club the "Who's Who" of Worcester Tech tripped the light fantastic to the melodious strains of Ken Reeves and his Orchestra.

Decorated by multi-colored balloons strung artistically from the balcony—yes, there was a balcony as advertised—and draped over the chandelier, the spacious ballroom presented a sparkling appearance for the gay crowd of students and guests.

Much credit should go to the committee of Brad Waterman, Tom Bourne, Ed Kiem, Bob O'Malley, John Lancaster, Paul Johnson, Al Raslavsky, Sam Kaplan and Chairman Robert Lloyd for overcoming all the many try-

## Camera Club to Be Headed by New Officers

Color Photography Subject  
Of Discussion Final  
Meeting of Year

The Camera Club held its last formal meeting of the season Monday evening, 7:30 P. M., May 17, in the library of the Mechanical Engineering building. About half the members were present. The speaker of the evening was Zigmund Burzycki, '38, who spoke on color photography. He described the theory behind the reversal-transparency method of color photography and showed some slides made in that manner. He also described the process of making color prints and the kodachrome method of obtaining screenless transparencies. This talk was especially interesting because of the slides which Mr. Burzycki passed around. Not many color photographs are being taken at the present time, and thus it affords a splendid opportunity for experimentation along this line.

After the talk on color photography concluded a short business meeting was held. The principal item was the election of officers for the coming year. Those elected were: President—Zigmund Burzycki, '38; Vice President—Marcus Rhodes '40; and Secretary—Kenneth Fowler '40.

## Graduation Week Marks Last Official Appearance of Four Distinguished Tech Professors

Sigma Xi Holds  
Annual Elections  
And Initiation

Korman, Johnson Elected  
Full Members; Student  
Research Papers Read

The annual meeting of the Worcester Chapter of Sigma Xi, national honorary scientific research fraternity, was on Tuesday evening in the lounge room of Sanford Riley Hall. Reports of the officers were read and new members initiated at that time. New officers were elected.

The initiation preceded the business meeting. The students elected into the society and initiated as associates are: B. Allen Benjamin, William E. Brown of Middleboro, Gordon F. Crowther of Framingham, Cassius C. Cutler of Springfield, Morton S. Pine of 29 Bridgeport Street, William P. Hall, of 28 Woodman Road, Ray K. Linsley, Jr., of Bristol, Conn., Samuel S. Naistat, of 42 Freeland Street, A. Hamilton Powell, of 92 Longmeadow Street, Oliver H. Raine of Auburn, and Leonard A. Young of 929 Millbury Street.

Dean Coombs, Dr. Jennings,  
Prof. Smith, Dr. Haynes  
To Retire

### LOSS TO STUDENTS

Their Many Years of Brilliant  
Service Have Brought  
Honor to W.P.I.

It is now but a matter of a few days until the final exercises will be held for the class of 1937. These exercises will probably see the last public appearance as members of the Institute of the four professors who are retiring this June, Dean Coombs, Prof. A. L. Smith, Dr. Jennings and Dr. Haynes.

All of these men have spent the best years of their lives at W. P. I. and each has reached the highest position in their respective departments. But with the coming of that man who will never wait, old man time, these brilliant men will retire with their glories and laurels of many years of service to an easier and more private life.

Dean Coombs seems to be heading toward a more public, rather than a private life. His plans for this summer and next fall include an even more rigorous and extensive speaking tour than he had had while connected with the Institute. His schedule will take him as far away as New Haven where he will speak to the New Haven Kiwanis of which he is an honorary member. Dean Coombs is hoping to spend some time on his farm in Auburn but inasmuch as Auburn is having their one hundredth anniversary this next month, because Dean Coombs will be actively connected with this celebration, his time may be limited a little in the amount of time he can spend in keeping his farm up. Memorial day addresses were given by Dean Coombs at Armory Square and at Paxton. Other plans of Dean Coombs include a training course for the caravan speakers of the Community Chest. During the past years, he has been a member of the School Committee and been the chairman of several Tercentenary celebrations including Worcester's in 1932. In all of these activities Dean Coombs has shown his many qualities and characteristics which have made him one of the foremost men in the community and all of these affairs have been done in addition to his regular schedule here at the Institute. Dean Coombs holds several offices in different societies which include that of the Worcester Historical society, for whom he has written three hundred sketches for the weekly Worcester Magazine, a Governor of the Board of Northeastern, Hope Cemetery and many others too numerous to mention.

Dean Coombs came to the Institute in 1890, after having taught one year at the Brooklyn Polytechnic Institute, and another at the University of Virginia as an instructor in English and since then has held many offices in both the administrative and teaching staffs of W. P. I. In 1935 he was made the first Dean of this school. It is with deep regret that we record this the loss of one of the most beloved

(Continued on Page 2, Col. 4)

Present Chapel—May Be Replaced in Future

ing situations that came up and for one of the most successful Soph Hops to be held by Tech.

One of the features of the evening was the singing of "Minnie the Moocher" by the six-foot trumpet player and the hot renditions by another member of the band of popular pieces on a midget "sweet potato."

Patrons and Patronesses included President and Mrs. Ralph Earle, Professor Richard A. Beth and Miss M. Elizabeth Sawyer, Professor and Mrs. Frank C. Howard, Mr. and Mrs. M. Lawrence Price, and Mr. and Mrs. Carl G. Johnson.

## ATHLETIC ASSOCIATION ASSEMBLY

June 2, 1937  
11 A. M.

Presentation of Individual  
and Fraternity Awards

Erving Arundale of Andover, Daniel J. Hastings, Jr., of 14 Crown Street, Ralph H. Holmes, of 276 Burncoat Street, Richard J. Lyman of 38 Hollywood Street, Carl S. Otto of South Hadley Center, John B. Sutcliffe of Waterbury, Conn., James F. Swartout, Jr., of Saratoga Springs, N. Y., and Henry T. Wrobel, of 32 Ormond Street.

A. Hallies Johnson and Nathaniel I. Korman were elected into full membership in the society, while Verner R. Olson of 26 Stebbins Street, post graduate student and instructor in chemistry, was promoted to full membership.

## good-bye mr. chips

It is with deepest regrets that we, as students, note that, with the passing of the present school year, four of our most beloved faculty members will retire from active life in school affairs. The departure of these four men, who for so many years have stood before their classes and given to their pupils knowledge and wisdom which has proved its value since, will leave empty places in the teaching staff that will not be easy to fill.

Each of these distinguished men has lived the Biblical span of "three score and ten" and each has contributed many loyal years of service to the Institute. In this time each one has reached the top in his line and has guided that position to a higher plane than it was left when passed on by his predecessor.

Dean Zelotes Coombs—fondly spoken of by alumni and students alike as "Coombsie"—has been teaching the mother tongue to Freshmen and Sophomores, correcting student English compositions and listening to talks for years and years. He has acted as official greeter to returning alumni and prospective students and has truly endeared himself to all who have met him.

Professor Alton Smith—"A.L." in student conversations—has long guided group after group of Mechanics and others through the intricacies of machine operations and design. His patience and good humor, to say nothing of the excellent quality of his instruction, long ago earned for him the respect and admiration of all students and graduates who know him.

Doctor Walter Jennings—known as "Doc" to his students—many classes ago took his place in the Chemistry department where he has risen to the office of Head of Department. Here he has spent much faithful effort in the betterment of his section and he holds a place in the hearts of all those who have studied under him and been associated with him.

Doctor George Haynes—affectionately called "Ginny"—has taught the principles of economics and straightened out the intricacies of government systems for classes for long years.

(Continued on Page 2, Col. 5)

## lest we forget

Although this editorial is several months ahead of itself, it seems appropriate to reiterate a certain matter which usually causes a great deal of unpleasant comment after the various things take place, since this is the last issue of the NEWS that many of you will see till September. This is the matter of Freshman Sophomore rivalry during Freshman week.

Time and again various representative groups on the Hill attempt to curtail the off-campus activities that occur between the two lower classes during this period. President Earle is definitely against such rivalry since it invariably causes property damage, calling-in of the police and a general tension in the relations with our neighbors. Such rowdyism is detrimental to the well-being of the Institute.

However, this does not mean that interclass rivalry should be abolished; only that it should be confined to the campus which, incidentally, comprises thirty-six acres. Therefore let us give our whole-hearted support to any plan that may be devised by the Tech Council or Skull to end off-campus rivalry.

## Sigma Xi Holds Annual Election and Initiation

(Continued from Page 1, Col. 4)

The business meeting followed the initiation. After the business meeting four papers were presented. "Experimental Studies on Flow of Water under Earth Dams," was given by B. Allen Benjamin of Shelburne Falls. William

The Rendezvous of Who's Who

## Departmental Notes

## Electrical Engineering Department

On Tuesday, June 1, Mr. Crumb will address the Seminar on the subject entitled, "Discussion of the Graeffe Method of Solving Equations and Applications to a Specific Problem."

On Wednesday, June 3, the Student Branch of the A. I. E. E. will hold its final meeting at 7:00 P. M. in Sanford Riley Hall. There will be a report on the Buffalo Convention by the delegates.

## Physics Department

On Tuesday, June 1, at 4:15, Dr. Masius will speak on "Heat Conduction in Moderately Rarified Gases" at the Physics Colloquium.

Two Physics lectures, at which attendance was voluntary, were given to interested Sophomores during the past week. The first, on Thursday, by Dr. Beth, was on "The Elementary Particles of Matter"; the second, on Saturday, by Dr. Masius, was on "An Elementary Consideration of the Experimental Basis of the Theory of Relativity."

## Civil Engineering Department

A group of Senior Civils have taken on option on city planning. They are to lay out an industrial village which would occupy a stretch of land west of Brook Street.

## Chemistry Department

The Skeptical Chymists held a successful banquet on Wednesday, May 26, thus closing the organization's activities until the fall. Dr. Walter L. Jennings, who founded the group in 1917, was the guest of honor at this twentieth anniversary meeting. In addition to a sumptuous collation, two talks on Chemical subjects were presented and a number of members were presented with their shingles or seals.

## The Collegiate World

Caught while trying to swipe lace "panties" from the dressing room of a burlesque star as a fraternity initiation stunt, Henry Brewer, a student at Massachusetts Institute of Technology, faced criminal charges until "Kiki" Roberts, the pilfered-from, refused to press claims against him.

The boner pulled by a University of Minnesota freshman who wanted to know "what building the campus is in" was bad, but the one made by an adult visitor to the University of Cincinnati was worse.

A professor took the trouble to conduct the visitor and his party all over the campus and finally to the football stadium. "This," exclaimed the faculty member, "is our stadium!"

Impressed the visitor studied the grounds for an instant and turned to the professor: "This is all very nice, but I hear you have a very fine curriculum here. Would you take us through that next?"

F. Hall read a paper entitled "Equilibrium in Liquid-Vapor Systems." The Design and Testing of a Model Propeller-Type Windmill," was presented by A. Hallies Johnson. Nathaniel I. Korman presented his paper on "Design, Construction and Test of a Cathode Ray Oscilloscope." Mr. Korman won first prize with this paper at a recent district convention of the A. I. E. E. in Buffalo, N. Y.

## Four Tech Professors Retire After Graduation

(Continued from Page 1, Col. 5)

and brilliant men on the Hill but it is with a more cheerful note that we record his promise to come back and visit us occasionally.

Prof. A. L. Smith was graduated from the Institute in 1890 and received his masters degree in 1899. Since then he has been actively connected with the Institute as a member of the mechanical engineering staff. He has taught or been connected with the machine design work for 55 years and according to Prof. Smith, "I'm through—I quit. I believe that 55 years of this machine design is enough for any man." Prof. Smith has made many plans for his future. Among those are the plans for research books on the genealogy of several families and perhaps some more writing for the Boston Transcript along the same line. He also may make a trip to California this fall to visit a daughter in Berkeley. Prof. Smith spent some of his early life in Springfield, Mass. He went into a machine shop and from the time of his graduation in 1890 to the present time he has been a teacher of machine design. He has reached the pinnacle in his department, being head of the Mechanical Engineering department and assistant to the President.

Dr. Jennings, head of the chemistry department, was graduated from Harvard in 1890 and received his Ph.D. two years later. He studied at the University of Berlin and since 1894 has been connected with the chemistry department of W. P. I. until he has reached the highest position, that of head of the department. Dr. Jennings does not plan to be inactive in his line but he is planning to go abroad with his daughters visiting England, France, Austria and Germany. He will attend several Chemistry exhibitions and conferences while there.

Dr. Haynes is another head of a de-

partment to be lost to W. P. I. He has been connected with W. P. I. the longest of any of the men retiring. He became instructor of modern languages in 1887, taught mathematics for a year and then went back to modern languages. Since 1893 he has been a professor of economics and government and has reached the highest point in his department, that of head of the department of economics and government. Dr. Haynes was graduated from Amherst and got his Ph.D. from Johns Hopkins in 1893. Dr. Haynes plans to make his home here and do very little besides keep a beautiful garden and lead a private life in Worcester.

(Continued from Page 2, Col. 1)

This, with a lively, interesting, and witty commentary on current events, has made those undergraduates whom he has instructed recognize him as a real "good fellow" and his retirement leaves them with the most pleasant of memories.

As the time nears for these men to leave us, we suddenly realize the total inadequacy of words in attempting to describe our appreciation for all they have done for us. It does not seem possible to state in our meager vocabulary that which we wish to express as a parting tribute.

Perhaps we can hope that in future years these professors will have cause to look back on the time they have spent with us with satisfaction, happiness, and a sense of "a good job, well done." Perhaps we can hope that they will feel as Chips did when he said:

"I thought I heard you—one of you—saying it was a pity—umph—a pity I never had—any children . . . eh? . . . But I have, you know . . . I have . . ."

"The other smiled without answering, and after a pause Chips began a faint and palpitating chuckle.

"Yes—umph—I have," he added, with quavering merriment. "Thousands of 'em . . . thousands of 'em . . . and all boys."

## Tech Baseball Squad Suffers Third Defeat of Season at Hands of Trinity College

### Trinity Scores Three Runs in First Inning as Tech Gets Off to Bad Start

**FINAL SCORE 8-5**

### Engineers Score in Fourth Inning But Fail to Rally as Trinity Tightens

Tech's nine suffered its third setback of the season at the hands of Trinity College at Hartford last Thursday by the score of 8-5. Lambert, the Engineer's starting pitcher, got off to a bad start allowing Trinity to score three times in the initial frame. He looked good in the second inning when he fanned two men, but weakened again in the third when he again allowed the Blue and Gold to cross the plate for three runs. Ben then settled down and prevented any further scoring during the remaining four innings which he pitched.

Patton, Trinity's ace right-hander, started strongly by allowing one hit and no runs for the first three innings. However, the Boynton-hillers managed to score twice in the fourth with two hits with the help of some spotty fielding by Trinity's infield. The Engineers added another run in the fifth and nearly tied the score by tallying twice in the eighth inning. At this point of the game Driscoll took over the mound duties for the Engineers. Johnny was

wild, walking two men. These walks were responsible for the final two tallies accredited to Trinity.

The fielding gems of the game were turned in by Shelly of Trinity in the ninth inning when he made three brilliant pick-ups to retire the side single handed. Another feature of the contest was the base stealing of Kobrosky, Trinity's fleet-footed outfielder. He stole four bases on Bodreau in spite of the fact that Al has a good and accurate throwing arm.

## Tech Tennis Team Victorious Over Springfield, 4-2

### Team Setback by Trinity, 5-2; Rain Hampers Season, Team Improved

Last Wednesday, the tennis team, paced by Captain Michel, defeated Springfield College on our own courts. The entire team played well and hung up their first and only victory of the season. On Thursday, they went to Hartford where they received another 5-2 setback from Trinity in the last match of the season. Here again Michel found his stride and defeated his singles man. Last Sunday the team attempted to make up their match with Assumption, but were driven off the courts by a thunder shower, the score at that moment giving Assumption the lead 3-1.

In the match with Springfield College, Michel, Bosworth and Brand took their singles matches, with Bob Nimmo barely losing out in the third set of a hard contest. Michel, after dropping the first set, came back with plenty of power and took the next two, 6-1, 6-1. Bosworth took his first set, but couldn't quite grab the second one; he easily copped the third, however. Brand had the shortest singles match when he defeated his opponent in straight sets. Michel and Bosworth easily took the doubles contest in two sets, but Brand and Goldsmith, after taking the first set, lost out in a grueling endurance contest. All of the matches were interesting to watch, with plenty of good tennis on display.

In the match with Trinity Michel again dropped the first set, but then, finding a weakness in his opponent, he easily took the next two. Nimmo, Bosworth, Brand and Goldsmith all lost in their singles in two-set matches. In doubles Michel and Bosworth lacked their usual drive and lost, but Nimmo and Brand earned their first doubles victory of the season, after dropping the first set. The team was still recuperating from the hard match the day before, else the score would have been closer.

Thus the 1937 tennis season has been completed with six losses and one win in the matches completed. The team did not get going early in the season mainly due to poor weather conditions, but they showed vast improvement in the last few matches. Captain Michel proved his worth by taking the last four singles matches which he played, and his graduation will surely mean a great loss to the team next year.

Summary of Springfield College match: 4-2, Tech

Singles, Michel defeated Anderson, 3-6, 6-1, 6-1; Hanson (S), defeated Nimmo, 2-6, 6-3, 6-4; Bosworth defeated Marr, 6-2, 8-10, 6-1; Brand defeated Wilbeck, 6-2, 6-4.

Doubles, Michel and Bosworth defeated Anderson and Hanson 6-2, 6-4; Marr and Wilbeck defeated Brand and Goldsmith, 3-6, 11-9, 6-0.

Summary of Trinity match: 5-2, Trinity  
Singles, Michel defeated Parsons, 3-6, 6-0, 6-3; Harris defeated Nimmo, 7-5, 6-0; Rohowsky defeated Bosworth, 6-3, 6-1; O'Bryon defeated Brand, 7-5, 6-1; Dodge defeated Goldsmith, 6-2, 6-4.

Doubles, Parson and Harris defeated Michel and Bosworth, 6-3, 6-3; Brand and Nimmo defeated Dodge and Rohowsky, 4-6, 6-1, 7-5.

After scribbling three pages during an exam, a Marquette University student wrote: "I don't think you'll read this far, and to prove it I'll tell you about the basketball game I saw yesterday." He wasn't called on his five page sports discourse.

## Tech Baseball Squad Suffers Third Defeat

(Continued from Page 3, Col. 1)

Innings	1	2	3	4	5	6	7	8	9
Trinity	3	0	3	0	0	0	0	2	x-8
Worcester Tech	0	0	2	1	0	0	2	0	-5

Runs, Gustafson, Forkey, Korolyshun, Casey, Lambert, Jackson, Morris, O'Malley 2, Kobrosky 2, Rihl, Patton. Errors, Jackson, Rihl, Lindell 2, Rushton, Forkey, Lambert, Messimer. Two-base hits, Morris, O'Malley, Kobrosky. Stolen bases, Kobrosky 4, O'Malley, Rihl, Lindell. Sacrifices, Shelly, Morris. Double play, Rihl to Morris; Gustafson to Forkey. Left on bases, Trinity 8, Worcester Tech 10. Base on balls, off Patton 3, Lambert 4.

Passed balls, Bodreau. Losing pitcher, Lambert. Umpires, Elliott and Muldoon. Time of game, 2h. 22m. aBatted for Lambert in 8th.

## This Collegiate World

When grades shoot up all of a sudden, professors become suspicious and try to find the reason.

This one at Georgia Tech traced the skyrocketing marks to the fuse and discovered what was what.

Grades had been just average until

Clifford Witcher, a blind student, brilliant in his studies, entered the class, the professor noted.

In writing his quizzes, Witcher used a typewriter. Since all the tests were true and false, the poorer classmen would wait for the typewriter clicks and write "yes" when they heard three and "no" when they heard two. The professor smiles again, grades

have slumped back to normal, and students are unhappy because Witcher now has to tap a period mark after each "no" answer.
