## GOLFERS HAVE BEST RECORD OF TECH'S VARSITY SPRING TEAMS

### Ball Tossers Take but One Game; That One from Clark---Trinity Game Is Rained Out

### SPRINGFIELD TAKES OUR LAST MATCH, 4-2, CLOSING THE TENNIS SEASON

To climax the activity of the varsity teams for the year, a total of five contests were scheduled during the week. Only three of these were played, while the other two were canceled because of wet grounds.

To start off the week, the golfers took a severe beating from the Holy Cross mashie swingers by the one-sided score of 6-0. Holy Cross had little or no trouble in all the matches with the exception of one, that being the match between Capt. Dick Hartigan of Holy Cross and Leo Benoit, Sophomore star on the Tech team. The former won, 1 up, after a hard fight. In like manner, the Cross won, 1 up, one of the foursomes. All in all, the match was a good one, even if we did lose.

The Boynton Hill golfers, however, proceeded to administer the same dose to their opponents from Tufts, Friday, at the Wachusett Country Club. The Engineers easily won every match played.

The Golfers set up an enviable record during the season, and their record was not surpassed by any other team on the "Hill." The team defeated Boston University, M. I. T., Providence, and Tufts and lost to Amherst and Holy Cross; it consisted of Kowalski, Sleeper, Benoit, Sadick, and Grubert, alternate.

The Tennis men were scheduled to play Springfield and Trinity, but were able to engage with the former only, losing by a 4-2 score. Norton and Borden were the only Worcester winners. The match ended the season and is just another proof that engineers don't have nearly enough time to turn out good teams. The team lost all its matches except the Providence College encounter, which ended in a three-all tie.

Trinity was scheduled to play the baseball team Saturday on Alumni Field, but as the rain-soaked diamond was not in playing condition, the game was canceled. Since it is so late in the season, neither this game nor the Trinity tennis match will be played.

Rhode Island State and New Hampshire won close games, while North-eastern and Mass. State had little difficulty in downing the ball tossers. The annual series between our historic rivals from Clark resulted in each team winning a game. "Andy" Sanquist pitched the only winning game and in doing so collected a home run and a single. "Spitz" Bottcher was the batting star of the season.

Capt. Roy Driscoll and Roman Koziol will be lost by graduation, Luce, Moosa, Des Rochers, Hibbard, Starrett, Bottcher, Cantor, Howes, Sandquist, and Casey, will be back to bolster the Tech nine.

## L. X. A. REMAINS UNDEFEATED IN BASEBALL

### L. X. A., T. U. O., A. T. O. and Friars Are the Week's Winners; This Week to Decide Changes

The intramural baseball games are still going strong, having just completed the fifth week of the series. L.X.A. continued its unbeaten score, but the close second, P.S.K., dropped to L.X.A. in the first game of the week.

On Monday P.S.K. and L.X.A. played in the first game. Naturally because of the standings of these teams this game meant a great deal to both, but after a good and well-played game, P.S.K. dropped to L.X.A. with a score, 7-1.

Following this game T.U.O. played the Friars. Hastings, who pitches for the Friars was unable to do so because of a bad arm, and Mieczkowski who had never filled the position before, was forced to try his skill. The game was, however, rather one-sided and closed with T.U.O. winning 16-5 in three and one-half innings.

P.G.D. and A.T.O. were the participants in the third game of the week. A.T.O. raised its standing at this game and rather decisively drubbed P.G.D., 16-12. This game placed A.T.O. in the same class with P.G.D., each having now won 2 games, although A.T.O. has played once more than P.G.D.

The game between S.A.E. and the Friars on Wednesday closed the week. The match scheduled for Thursday between L.X.A. and T.U.O. was postponed till the early part of next week, and Friday's game between P.S.K. and (Concluded on Page 3, Col. 3)

### CALENDAR

- TUES., MAY 29—  
9:00 P. M.—2:00 A. M.—Soph Hop, Sanford Riley Hall, Leo Hannon's Music.
- WED., MAY 30—  
Memorial Day—No Classes.
- THURS., MAY 31—  
4:00 P. M.—"Peddler" Elections B-19.  
4:30 P. M.—Intramural Baseball, L.X.A.-T.X.  
5:30 P. M.—Intramural Baseball, P.S.K.-T.U.O.
- FRI., JUNE 1—  
7:30 P. M.—Cosmo Club Meeting at home of Paul Swan.
- SAT., JUNE 2—  
11:00 A. M.—Athletic Assembly. Alumni Gymnasium, Letter, Intramural Awards; Election of Officers and Captains.
- SUN., JUNE 3—  
Stay Home and Study—Exams Start Tomorrow.
- MON., JUNE 4—  
9:00 A. M.—Examinations for the work of the second semester.  
See Schedule on Page 4 of this issue.

## LAST ASSEMBLY WILL BE THIS SATURDAY TO REWARD ATHLETES

### Captains of Baseball, Basketball, Track, Swimming, Golf and Tennis to Be Elected

## McLAREN PULLS 32 LB. COD FROM OCEAN DEPTHS

### Senior Electrics Set Out From Boston on Record Trip---One Seasick

There's something fishy on our fair campus, as any E. E. will tell you. Last Wednesday saw no less than twenty-two of the senior E. E.'s participate in the annual fishing trip so widely heralded hereabouts. Old customs are hard to overcome, hence the boys were a mite late starting for Boston, but soon made up for lost time. When the last car load had successfully solved Boston's and Birch's somewhat rambling directions, the argonauts weighed anchor and set sail for points unknown, but in the general direction of Europe. With only a slight ground swell running it was not long before the pilot raised Boston Light. The Light was not the only thing raised. With one lone exception all the sturdy mariners had quickly acquired their sea legs, but after taking the wake of an incoming steamer, the news that the lookout had raised the Light was old stuff as far as Abe was concerned. The novelty had worn off.

About twenty miles out all hands baited up and awaited the first catch. Unknown to the gang, Anderson had engaged an ambitious clam of the first magnitude for the business, and when he hauled in the first cod and pocketed the four bit prize for doing the same, it was with the satisfaction that Engineering always pays. Soon the lads were pulling them in hand over fist, Bob Fulton bringing in his prize with such alacrity as to show very convincingly that codfish must be well

## BIG CUP TO BE AWARDED TO EITHER PHI SIG. OR LAMBDA CHI ALPHA

The last assembly of the school year will be held in the Alumni Gym at eleven o'clock on Saturday, June 2.

Phi Sigma Kappa and Lambda Chi Alpha have won two legs on the cup for intramural athletics, and if either win the baseball competition they will get the cup. If P.S.K. takes second place they win the cup; if they take third, and L.X.A. first, L.X.A. wins the cup. At present Phi Sigma Kappa is offering the greatest resistance in the intramural baseball league. The Trophy will be presented at this assembly on Saturday.

The athletic association will elect officers for the following school year. The present officers are Michael Warwick, President; Plummer Wiley, Al Cantor and Anders Sandquist.

The following are candidates for the baseball letter: Arthur Moosa, Richard Howes, Irving Bottcher, Floyd Hibbard, Roy Starrett, Roy Driscoll, Roman Koziol, Al Cantor, Charles Luce, Anders Sandquist, John Casey, Roy Des Rochers.

For the Golf letter, the following are candidates: Anton Kowalski, Donald Sleeper, Louis Sadick, Leo Benoit, William Grubert.

For Tennis: Shepherd Palmer, Sonny Norton, Joe Flannigan, Carleton Borden, Richard Merriam.

Competing for next year's captaincy in baseball are: Floyd Hibbard, Ray Starrett, Al Cantor, Evan Luce, Roy Des Rochers.

Roy Starrett is the favorite since he has been catching for the varsity baseball squad for three years. Dan Sleeper is expected to get the captaincy of Golf, but the selection for Tennis is a toss-up. There are three men in the running for Track captaincy, namely, Marshall Dann, Harold LeDuc, and Paul Shepler. All these captains will be elected at the assembly Saturday, and the insignias will be voted on at the Athletic Association meeting Thursday night.

Since this is the last assembly of the year, the students are earnestly urged to co-operate by attending and finding out "Who's Who" in Tech, if they don't already know. Remember that these men to be rewarded Saturday are the men who have put Tech on the "athletic map," and they deserve our whole-hearted support. The attendance at assemblies this year has been unsatisfactory as a whole, but it is expected that the student body will give its co-operation to make the last assembly the best attended.

stream-lined. Everyone eventually caught something. Egan first caught a muscle, then a sculpin, next a periwinkle, and then a dogfish. Charlie also caught a cod, but it looked for a time as if not even the Atlantic Cables (Concluded on Page 2, Col. 4)

## COMMENCEMENT ADDRESS BY COX

### Ex-Governor to Give Main Address---Banquet Opens Festivities

Plans for the commencement week of the class of 1934 are rapidly progressing. As is the usual procedure the ceremonies will begin on Tuesday evening, June 12, with the Senior Class banquet. Wednesday will be celebrated as class day with ceremonies coming in the afternoon and evening. Ev. Sells, Senior Class president will give the address of welcome to friends and parents, followed by the presentation of the class gift. Warren Burns of Plymouth, Mass., will deliver the ivy oration for the final afternoon ceremony. (Concluded on Page 3, Col. 4)

Worcester Tech's 1934 Baseball Team. Front row, left to right: Jack Casey, cf, Art Moossa, 2b, Floyd Hibbard, 1b, Ray Des Rochers, lf, Irving Bottcher, ss. Second row: Andy Sandquist, p, Dick Howes, 3b, Kor-sung Koziol, cf, Coach Ivan E. Bigler, Francis Harvey, p, Capt. Roy Driscoll, p, Ray Starrett, c, and Evan Luce, rf, were absent when the photo was taken.

## TECH COUNCIL

How many of our students stop and consider the functions of our Tech Council? Does it not seem to be a rather inactive organization? We feel that the Tech Council accomplishes very little in its capacity as a student governing body and that it is a very disinterested group. Why can we not have an active and enthusiastic Council? Our guess is, that we take too much for granted. We sit back and let matters coast along, taking their own courses instead of presenting our ideas as a means of constructive criticism. It can be plainly seen that the faults lie in the Council's operation and its personnel. A body must have work to do in order to remain active, and the personnel must be willing to give its support in order that results may be obtained. One member of the faculty stated that "It takes a meal to get the whole Council in attendance." This is just about true.

Now the question arises—"How can we remedy these conditions?" In the first place, let us provide work for the Council, let us give the Council more power, and let us have the Council investigate the governing bodies of other campi. In the second place, let us be more conscientious in our selection of Council members. Our choice should be made on the basis of ability rather than various reasons of less practical consequence. If we carried our criticisms to the Council, rather than confining them to group discussions, we would be providing material for discussion of the Council. There is no good reason that we should be lacking in a wide-awake student organization. Is it a typical characteristic of engineers that we should be deficient in zeal and ambition? If such is the case, let us try to overcome this difficulty, let us try to be "on our toes" and ready to take advantage of opportunities for advancement and improvement.

## SOPHOMORES ASSURED OF PERFECT HOP AS PLANS NEAR COMPLETION

Leo Hannon and His Musical Bell-hops to Be Featured at Gala Spring Formal on Evening of May 29

## COLOR WILL BE ADDED BY DEBUT OF NEW JACKETS—ENDS SOCIAL SEASON

The annual Soph Hop next Tuesday night promises to be one of the most enjoyable events of the year to take place on the hill. The dance committee consisting of Don Edmunds chairman, Carl Borden, George Rocheford, Ted Yeo, Ham Gurnham, Louie Sadick, Paul Downey, George Sherwin, and Ed Montville have completed arrangements for the dance to be held in Sanford Riley Hall from 9 P. M. to 2 A. M. Over a hundred couples are expected to trip the light fantastic to the enticing syncopations of Leo Hannon and his "Musical Bellhops" an orchestra of fourteen pieces, which has recently completed a winter's engagement at the American House Rathskeller in Boston. This orchestra played for the Bowdoin College Prom and has also appeared in several of the leading ballrooms in New England. The patrons and patronesses attending will be

Pres. and Mrs. Ralph Earle, Mr. and Mrs. J. E. Fitzgerald, Mr. and Mrs. A. F. Townsend, Mr. and Mrs. A. M. Tarbox, Mr. and Mrs. G. E. Hollstrom, and Mr. and Mrs. M. L. Price. The dress will be spring formal and as is customary the new Junior jackets will make their debut, worn by the Sophomores. This will probably be a climax to social activities on the hill before the engineers start cramming for those final exams. Although this is not expected to surpass the Junior Prom in all its formality and splendor the dance will be a most pleasing and entertaining affair for those attending. Those who have enjoyed the Dorm Dances last fall and this spring will now have a chance to enjoy a bigger and better dance. The dormitory offers a pleasant setting for dances, and with low lights, a warm night and a full moon the Soph Hop will take place in the finest of environments. As there are no classes the next day and this being the last dance on the hill before exams, a good crowd should attend.

## 31 LEADERS TO ADVISE COLLEGE MEN AND WOMEN

"Choosing a Career" Convention to Be Held June 26, 27, 28 at Newark, N. J.

One of the greatest galaxies of "Who's Who" men and women ever assembled in an educational cause will come together next June when thirty-one Americans of world-known achievement gather to form the "faculty" of the first Choosing-a-Career Conference for college men and women, to be held in Newark, June 26, 27, and 28, it was announced today by George Bijur, director of the conference and member of the Administrative Board of L. Bamberger & Co., where the convention will be held.

Bankers, railroad presidents, famous dress designers, noted journalists—leaders of thirty-one different fields, will speak on the career opportunities in their respective branches of American affairs.

Merlin Hall Aylesworth, president of the National Broadcasting Co. and Radio-Keith-Orpheum will be among the principal speakers.

Mr. Aylesworth will talk on radio as a career. He started his own career in radio without the slightest knowledge of what it was about. When he was

MERLIN H. AYLESWORTH

first approached to enter the field he was not yet forty and the Managing Director of the National Electric Light Association. It took the combined persuasion of such men as Owen D. Young, General Guy E. Tripp, and Major James G. Harbord, to convince him that radio offered broader and more interesting opportunities.

With no technical knowledge of broadcasting, but with a wide experience in public relations, he settled down to the task of adapting a new invention to a practical and worthwhile use.

It is a job for a master organizer, and Aylesworth has been an organizer all his life. He showed his ability along this line early. During his boyhood in Colorado, where his family moved when he was nine, he was always organizing boys' clubs and forming associations.

Out of high school and into college, he continued to direct and organize everything with which he came in contact.

He attended several colleges, including Colorado Aggie, of which his father, Barton Orville Aylesworth, was then president. The elder Aylesworth had been a minister in Cedar Rapids, Iowa, when Merlin was born, and as a minister's son the radio executive learned many things that have helped him in his later life. He learned the value of tact and consideration for the feelings of others. That qualification has enabled him to surround himself with a group of friends that includes the best known men in the nation.

His first job followed his graduation in law from the University of Denver, and consisted of collecting bad bills for the local medical society. Although

## E. E. FISHING TRIP

(Continued from Page 1, Col. 5)

were safe. Julie Ray thought he had a derelict on the hook for a time, but it turned out that he had merely snagged bottom. That being cleared, the captain of the vessel tangled with Julie's line, and drawing it up on the opposite side of the boat, attached a fair-sized cod thereto, and threw the "catch" overboard. Very deceitful, but merry fun, nevertheless.

As if in answer to this challenge to Engineering prowess, Fred McLaren yanked a very neat thirty-two pound cod out of the briny deep, said cod being one of the best caught this season. As best catch of the day, there was literally a five dollar bill tied on the line as well. All gathered around to admire the prize winner, and congratulate the doughty Fisherman-Engineer, when, in some unknown manner, the whale gulped down a smaller fish placed in its mouth for scenic effect. As the victim represented the season's catch of Norm Monks, consternation reigned until the lost was found, the process being similar to the ancient one employed by one Jonah in some respects.

Activities were not all confined to fishing. The lone faculty representative kept scanning the horizon for a glimpse of the good ship "Oilzum" upon which he started his nautical career. Likewise the "King" of the pool room, who caught an aggregation of one cod and one cold, but even at that, it was the best results of his five trips as a deep sea handliner. After five hours a delegation headed by Fred Webber petitioned for a new deal in the line of bait, it being claimed that the clams were not trying.

At last the lines were taken in and the course set for Warren Avenue Bridge. It was high time, too, for the gulls were keeping Dayton on the jump. A fine trip up the harbour was enjoyed, even by Abe Wentzel, who concluded his personal input-output test and joined in the fun. About sixty fine fish had been caught in all, everyone claiming at least one, with the exception of Russ Smith, who didn't quite hit upon the correct formula. Johnny Birch had fared little better, for, by using two lines, he had caught a dog fish on one, and a bottle on the other.

Numerous sunburns were proudly exhibited the next day as arms were waved, distances estimated, and tales told concerning how the price would have been driven down and the market flooded had the entire cargo been landed at T-wharf. Messrs. Sullivan, Webber, Hedler and Davenport are to be congratulated for their fine continuation of a very popular Engineering custom here at Tech.

only twenty-four, he was soon rated an expert bill collector. Colorado juries discovered that the slim, dark-haired young lawyer always came to court with complete facts in any case. What he lack in experience, he made up for by an impetuous energy which deeply impressed jurors.

Next he tried politics. His work as an organizer in this field soon attracted so much attention that he was made chairman of the Colorado Public Utility Commission at the age of twenty-eight. He declined the Republican nomination for Governor, and some time later became an executive of the Utah Light and Power Company.

In manner and approach, Aylesworth is far from the fiction type of executive, who sits flanked by secretaries, transfixing visitors with a cold eye. He is of easy and gracious manner, with a warm and friendly hand-clasp that puts callers at their ease.

There is no member of the NBC organization who hesitates to enter his office when he has a suggestion to offer or a request to make. Although among the busiest of executives, Aylesworth manages to retain personal

## CAMPUS LOW-DOWN

The Sophomores will show how good they are in running dances Tuesday night when they put on the annual Soph Hop. With good music and all the other "fixins," it looks like everybody should have a good time. Unlike last year, they should all have their new jackets on display with a great many ideas in effect as to how they should fit properly. "Strike up the band."

The annual E. E. fishing trip took place during the week. We understand the repeal of the Eighteenth Amendment had no effect at all. They were content to live as the horrible goon's shipmate, with a hamburger and glass of beer. Of course, one good feature of the day was the uncovering of a great deep-sea fisherman from Lambda Chi. We would like to know who told him he caught a fish and who helped him land it. We heard they are going to buy a cart and go in the business.

Terrain! The camels are coming, and so is Erickson. We figure that at last he has met his lady love in some form or other. He has quite recently gone in for cigars, flannels, and white shoes. Besides that he has been tearing around trying to find out if he looks better with his hair parted in the middle. Maybe that explains why he recently bought two pictures.

This is a trifle late, but it should go in. Our chances for points in the New England track meet went down the alley when "Doc" entered Kalista in the shop put instead of hammer throw and discus. It's all in a day's work.

The tennis trips are over. In a way it is a good thing, at least for the "bus" drivers. Every trip they took resulted in some form of riot. On the Springfield trip number two had to drive home while another player sat on the car's owner to keep him out of sight going through the cities. This improvised means of transportation is also a result of the action of the Physical Education Department.

It looks as if "Ace" is going in for almost everything. This week we saw him running around with a film in his hand trying to see what the sun would do to some parts of it. He claims he was caught in an off moment through no fault of his.

It's rather amusing to note how the price of burlap went up with the N.R.A. Oh well, '36—you'll have to take the riding until the next class picks their jacket. Kinda on same lines as '35—n'est-ce pas? Well, you had a good one to model on!

We wonder just how good our chances are in obtaining a date or rather a rendezvous (Ron-day-voo) with a certain writer of one of the houses in the Frachat column. We think it would be a swell h-o-t time. Ah me—such is life.

One of the Junior editors had a birthday last Sunday. As was the usual custom, he was to be honored right after dinner—however, he took to his heels and led the boys a merry chase. However, as all good things come to an end, and so did his, especially when the well-known paddle was applied. Easier to stand now, eh Eli!

contact with practically all his associates.

He moves quickly, thinks quickly

Honey Dew Restaurant  
We specialize in Steaks and Chops

**LIBRARY NOTES**

The "Experimental Electrical Engineering and Manual for Electrical Testing" by Karapetoff and Dennison will prove useful as a work of reference and a guide for the practical engineer. The book contains descriptions of experiments covering a wide field of electrical engineering and discusses electrical instruments and electrical machines. Clear instructions and diagrams of connections are included in this book which may be found in the Electrical Engineering library.

Dr. Benson Y. Landis is one of the keenest of our contemporary observers of American life. In his volume "The Third American Revolution," he has combined his penetrating insights into American affairs with his fine sense of

values. The result is an exciting book which some will, no doubt, regard as a challenge, some as a fresh statement of the current crisis in our national life, and some as a shock.

Dr. Landis's little book is a pocket guide to the whole National Recovery Program. He tells us what was done, and when and why, in the framing of the legislation and in the resulting administrative organization. He treats the facts objectively and in concise fashion. The "revolution" which is to restore the balance between rural and urban forces and begin new habits of conduct is, he believes, in process. This book is in the general library.

The M. E. library contains V. L. Maleev's "Internal-combustion Engines." This book was written to give a general foundation for the proper understanding of the principles involved in the design and operation of internal-combustion engines, with particular atten-

tion to the trend toward high-speed engines. The author has had long experience in engine design and building as well as academic experience and has produced a thoroughly practical treatment embodying much of value to engineers interested in the selection and use of gas and oil engines, as well as to the student of the subject. An entirely new and complete discussion of two-cycle oil engines for use as large prime movers is given.

**INTRAMURAL BASEBALL**

(Continued from Page 1, Col. 2)

T.X. was called because of rain. S.A. E. strove to continue its winning this week, but dropped to the Friars, 1-2.

S.A.E. ....	1	4
Friars ....	2	4
A.T.O. ....	2	4

**COMMENCEMENT**

(Continued from Page 1, Col. 3)

Pres. and Mrs. Ralph Earle will hold a reception at their home for members of the graduating class and the faculty from four to six. Baccalaureate services will be held at Central Church on Wednesday evening, June 13. Rev. Dr. Sheppard Knapp will deliver the Baccalaureate sermon.

Commencement will be held on Friday morning at 10:00 o'clock in alumni gymnasium. The commencement address is to be delivered by Channing H. Cox, ex-governor of the state of Massachusetts. These more serious ceremonies will be followed by the annual Senior Prom on Friday evening at the Worcester Country Club. Music will be by Eddie Murphy and his orchestra.

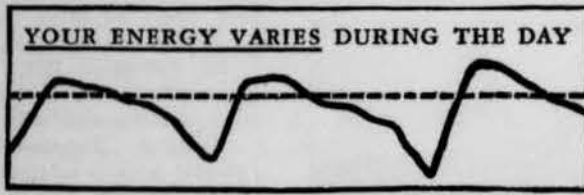

C. Marshall Dann, of Sharon, Pa., is to be the head Junior Marshall.

**'34 PEDDLER TO BE PRESENTED LATE IN WEEK**

**Senior Yearbook Is Dedicated to Professor Fairfield, Shop Head**

The "Peddler," the yearbook of the Class of 1934, will be released sometime during the latter part of this week. The delay has been caused, in some part, to the last-minute arrangements made and the failure of some to get their copy in on time. However, this book, the first under the new plan, will be one that will be appreciated by the entire student body, as well as being a long-sought-for memo. for the Seniors. Watch the bulletin board in Boynton Hall for further information.

**NEWS! Science reveals important new Facts for Smokers!**

*Camel Smokers can verify these facts!*

A famous New York research laboratory announces a basic discovery that throws new light on our past knowledge of cigarettes. It embodies an "energizing effect"...a quick restoration of the flow of natural body energy...an experience well known to Camel smokers. When you smoke a Camel you feel an

almost immediate relief from fatigue. You have released and made available the latent energy in your body. You've helped your body to help itself. During the day your energy curve hits certain low points. Camels raise your flow of energy...quickly, conveniently, and *without jangling your nerves.*

**There's a "Lift" in CAMELS that drives away Fatigue and Irritability**

Feel "all in"? Then light a Camel.

It's cool and fragrant and delightful...but far more important than that, it brings your flow of energy *up from the depths!*

You feel fatigue vanish. Irritability seems to slip away. And you go back to work—or play—with the energy that is *naturally yours.*

This experience is no news to Camel smokers. But the explanation is news—and *good news—to everyone.*

The "lift" you get from smoking Camels is simply a release of the natural latent energy in your body. You have helped your body to help itself...easily, naturally.

Remember this explanation when *your* energy curve is "down"...times when you're irritable and your brain just doesn't seem to work and you feel too tired to move.

Camel fans smoke frequently—and they can—as often as they like. Camel's costlier tobaccos never get on the nerves.

Keep *your* flow of energy at a higher level with Camels.

**TOO TIRED FOR FUN...and then she smoked a Camel!**

**CAMEL'S Costlier Tobaccos never get on your Nerves**

Camels are made from finer, MORE EXPENSIVE TOBACCOS—Turkish and Domestic—than any other popular brand.

**KNOW THIS FEELING?** The feeling of being too "all in" to respond to the gaiety of the crowd? No taste for the pleasure and fun of the sort of social evening that you would ordinarily look forward to? That's one of the many times to light a Camel, enjoying its rich flavor while your flow of natural, healthful energy is restored. You'll like Camels—a matchless blend of costlier tobaccos!

**"Get a LIFT with a Camel!"**

**FRACHAT**

**L.C.A.**

The "Cannie Scot" rated as the Big Fisherman in Boston Harbor Wednesday; but the other Electrics were not jealous, for per Psychology the Fisherman has the least intelligence. Even with his thirty-one-pounder, Fred had difficulty in convincing the brothers he was not "Throwing It." After deducting the tare-weight—the nine-pound head—the fellows had all the fish they wished, and warned the Scot against fishing again. The Moral is—Never tell a Scot, "There's a prize for the biggest one."

Tuesday evening at 7 o'clock there will be a formal dinner held at the house for those who shall attend the Soph Hop. The chaperons will be Dr. and Mrs. R. K. Morley.

The last house dance of the year will be held from 8 to 12 on Saturday, June 9.

**T.U.O.**

Not much news this week, although we might say in passing, that: Wimpy finally stayed home for an evening; after being out thirteen in a row.

"Pooper" can now see on Monday, Thursday, and Friday both.

The other night Amos got caught on Main street with Jo and two other Swedes.

Ace held another prayer meeting, no luck and no collection.

And that reminds us: The Middleboro Hot-shot tried to show us how to smoke a cigarette the other day; he took three drags and made a dash for the nearest open window. We had to practically put him in bed. Just can't take.

And in addition, Ace and Clint have put us in a tough spot; for, with those haircuts (?) they are wearing we don't know whether to speak to them when we meet them on the street, or to just pass quietly by as though we never saw them before.

Curtis broke out in a new suit this week, and a "road-map" tie to match it. What all the Brothers want to know is, "Where's the Fire Sale?"

We notice that Hebel is getting pretty careful these days. In fact, he even locks that private traveling privy (car to you), that he meanders around the Hill, when he parks it in front of the house.

The house has been fortunate enough to receive several gifts recently. The first was the very useful gift of a card table from Mr. and Mrs. George Comstock, Jr., our house-party chaperones. The next gift was a floor lamp from the girls who attended the house-party. The Seniors presented the house with a set of books as a final gift.

**P.S.K.**

Word has it that "Don Carlos" is quite worried about a date for the Soph Hop. It seems that he sent the young miss in question a Special Delivery letter and enclosed in said letter a self-addressed return envelope. The return envelope was also stamped Special Delivery, just to make sure. Let us know how you make out, "Don Carlos."

Phi Sig has acquired a solarium. It seems that "Willie" likes to go up on the roof and sun himself; it must be the cat in him. The other day he had the misfortune to put his foot through the ceiling of one of the rooms on the top deck. He treads the upper regions with lighter steps now.

The other day, C. J. (the Junior Electric) received his laundry case in good order. Upon examination of the contents there was found a cake from his sister. However, he looked further and saw that the cake was for his roommate. Was his face red?

"Hosea" was blessed with the new name of Joe Jones the other day. However, he refuses to commit himself one way or the other on the matter, but we have our own ideas.

"Growling Dan," it seems, has put some certain person in her place. Just another Bluebeard. No doubt he is

training for last summer's nightmare. Just throw her a bone, "Peachy."

The "Slug" has threatened to do some work one of these nights at the tennis courts. All we can figure is that they pay him for staying away.

The "Rabbi" is mildly perturbed over the fact that he just can't remember the name of the girl he took to the Prom. Bets at the house now stand 8-1 that the old man will know about it soon.

This past week saw a new gas range for the kitchen in place of the old battle-scarred one.

Parker Smith, Paul Reynolds and George Styffe were visitors at 11 Dean street over the week-end.

**T.X.**

With the house all decked out in a new spring coat of paint, and the beginnings of a lawn started, one would hardly recognize the place, if it were not for the familiar collection of various and sundry types of motor vehicles parked in their customary positions. A crew of brawny lumber-jacks, under the able supervision of our great out-of-doors man, Wiley, made short work of the stretch of virgin timber which has heretofore separated us from our next-door neighbors. In the process of deforestation it was discovered that one of our embryonic engineers actually knows the essential difference between a rip and a cross-cut saw. It is truly remarkable the things one learns at Tech.

If one of our romantic Juniors will stop trying to see the world through rose-colored glasses in the literal as well as the figurative sense, he will save himself a large portion of his light bill.

The new atlas is causing quite a sensation. Now we can learn all about these little spots on the left-hand side of the road which some of our friends call home. The big book has also been of great assistance to at least one person in planning his, or rather their, honeymoon.

**A.T.O.**

We are going to get together with Phi Gam and try to claim some kind of a record for the "baseball game" that we played last Tuesday afternoon and evening. It's a pity that we weren't playing nine innings. Our sincere apologies to Bob Webster.

The boys just can't seem to stay away, for during the last two weeks we've had the pleasure of seeing Palook Gartrell, Freddy Whitford, Don Smith, Ernie Holt, Carey Wilson, Dud Dudley, Dick Remy, Dick Porter, Salty Saltmarsh, and Dave Morse. Also, "C.K." is hanging around town.

Last Sunday all the boys and about twenty Alumni plus females went out to Rog Heald's camp in Barre for our annual picnic. Ask the boys and they'll tell you about it.

Ye Editor of the "Peddler" has been quite conspicuous by his recent and prolonged absences. Holyoke certainly has a great attraction for him. It is being rumored around that he is going to buy a box of seegars for us soon. They had better be good, for we've waited a long time for such a gift.

Taking a lead from T.U.O. we congratulate you, Tom, Jack, and Joe, for being tapped for Skull. We're proud of you.

Providence, R. I., May 25—Stedman W. Smith of 10602 Lake Shore Blvd., Cleveland O., former Worcester Poly. Institute student, was initiated last night into the Sphinx Club, honorary literary discussion society at Brown University, where he is a sophomore. Nineteen other selected undergraduates and graduate students were also made members.

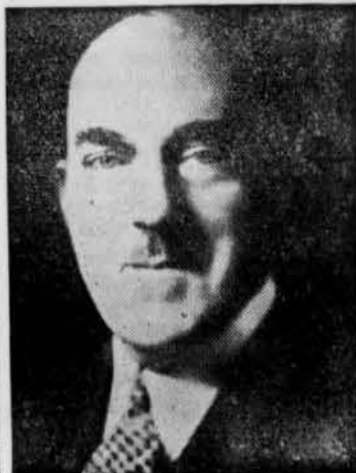

Well, so long, everybody—see you next year—or at least—so long!

**CHOOSING A CAREER**

(Continued from Page 2, Col. 5) and speaks quickly. Someone once said he could think of more ideas in an hour than the average man could originate in a month. He is not afraid to say "I don't know" when the occasion requires it, or to make an in-

**J. C. HEGEMAN**  
Building Genius, Who Created NBC Building, Radio City

stantaneous decision when the facts are clear.

Additional distinguished speakers include J. C. Hegeman, president of Hegeman-Harris Co., Inc., and noted builder of the National Broadcasting Building in Radio City, New York; and Chicago Tribune Building, and a long list of others; Miss Margaret Bourke-White, internationally famous woman photographer, and Richard Simon, of the New York publishing firm of Simon & Schuster, publishers of the late Charles Dicken's "The Life of Our Lord." Mr. Hegeman will point out to students attending the conference the advantages of the building industry as

a career; Miss Bourke-White will describe commercial photography as an income building life work, and Mr. Simon will explain the publishing field as a profitable business.

These new speakers are in addition to the names of prominent men and women already made known by George Bijur, director of the Conference. They include Leonor F. Loree, railroad magnate, who will tell of railroading as a career; C. M. Chester, president of General Foods Corp., food industry; Percy Straus, president of R. H. Macy & Co., retail merchandising; S. L. Rothafel ("Roxy") entertainment; Edward L. Bernays, public relations;

**ROY C. ANDREWS**  
Acting Managing Director, American Museum of Natural History

Amelia Earhart, commercial aviation; Roy Chapman Andrews, exploring; James P. Warburg, banking; Elizabeth Hawes, fashion styling; Nancy McClelland, interior decorating, and Neysa McMein, commercial art.

Leading Newark Hotels are offering special accommodations to students who attend the three-day conference. These hotels are the Robert Treat, of the United Hotel Chain; The Hotel Douglas, and the Hotel Riviera.

Thousands of tickets of admission have been mailed to Presidents and Deans of hundreds of colleges and universities east of the Mississippi. These will be distributed among interested undergraduates.

Conference headquarters in Newark have been in receipt of scores of letters of inquiry about the forthcoming inter-collegiate Convention, and indications are that the turnout of students will far exceed expectations.

Mr. Hegeman, one of the speakers, was born in Brooklyn, educated in the public schools there and graduated from Stevens Institute of Technology in 1905. He is a member of Beta Theta Pi Fraternity.

He entered the employ of the Otis Elevator Company in June, 1905. Two years later he became connected with the Heddon Construction Company, as rodman and assistant engineer on the construction of the City Investing Building. Later, with the same company, he served as material clerk, time-keeper, and finally assistant superintendent. In the course of the next few years he filled the positions of secretary, vice-president, and treasurer.

In February, 1917, together with John W. Harris, he incorporated the firm of Hegeman-Harris Company, Inc.

Margaret Bourke-White's photographic work is internationally known. Since 1929, she has been one of the associate editors of "Fortune," and has photographed industries for them, and national advertisers, in many parts of the United States, Canada, and Europe. During the four years she has been in business, she has photographed practically all the major industries in the United States. Taking pictures 30 degrees below zero in lumber camps in Canada where it was so cold that her lens froze and she had to go from place to place on snow shoes, and then standing over red hot metal in a steel (Concluded on Page 6, Col. 3)

**SCHEDULE OF FINAL EXAMINATIONS, JUNE, 1934**

(All Examinations are at 9 A.M.)

Class	Mon. June 4	Tues. June 5	Wed. June 6	Thurs. June 7	Fri. June 8	Sat. June 9

## "COLLEGE SPECIAL" GIVES LOW RATES IN R. R. FARES

### Vacation Trips Made Cheaper

In a spirit of co-operation with students, parents and school authorities, the railroads of the United States and Canada are again extending the convenience and economy of "College Special" round-trips for the school year 1934-1935 between home stations as a point of origin and the school stations that serve educational institutions. The "College Special" fare is one and one-third of one-way first-class fare for the round-trip and liberal stop-overs going and returning have been arranged with the only restriction that each single trip shall not take more than ten days. Railroad travel is the most convenient, comfortable, safe way to make such trips.

## ARCHITECTURAL JOBS FOR C. E.'S

### New Positions Open Announced by U. S. Civil Service

The United States Civil Service Commission announces the following-named open competitive examinations:

Associate Naval Architect  
Assistant Naval Architect

Applications for the positions of Associate Naval Architect and Assistant Naval Architect must be on file with the U. S. Civil Service Commission at Washington, D. C., not later than June 19, 1934.

The entrance salary for Associate Naval Architect is \$3,200 a year, and for Assistant Naval Architect \$2,600 a year, subject to a deduction of not to exceed 10 per cent until June 30, 1934, and of not to exceed 5 per cent during the fiscal year ending June 30, 1935, as a measure of economy, and also to a deduction of 3½ per cent toward a retirement annuity.

Applicants must have had certain specified education and experience.

Full information may be obtained from the Secretary of the United States

## THEATRE STUDY IS OFFERED

### Well-known Professionals Will Offer Services

PROFESSIONAL SUMMER THEATRE—operating during eight summer weeks—has openings in various departments for talented young people who are interested in acting, playwriting, the designing, building and painting of scenery, lighting, stage management, business management, publicity, etc.

A thorough and practical study of the theatre under the expert guidance of reputable professional people, with the opportunity to indulge in every or any of the above mentioned branches of the theatre and a chance to work with professional casts in well-known Broadway plays and in plays to be tried out prior to Broadway presentation in the fall.

Only a limited number of applicants can be accommodated.

Civil Service Board of Examiners at the post office or customhouse in any city, or from the United States Civil Service Commission, Washington, D. C.

## CHOOSING A CAREER.

(Continued from Page 4, Col. 5)

mill to catch the heat being poured at the right moment. One of her early commissions in New York was to photograph the Chrysler Building whilst it was in process of construction, and this she did by hanging from the scaffolding. Some pictures were taken from the very top of the spire one thousand feet above the earth . . . in a December gale so strong that it took three men to hold her tripod. Then she has been one thousand feet below the earth and taken pictures of miners at work.

In 1930, she made a trip to Russia to photograph industrial developments there. During the time she had been there she was able to secure a photographic record of the most important industries covered by the Five Year Plan.
