The screenshot displays the Denti.AI software interface. At the top, there are navigation tabs for 'X-RAY', 'PAN', 'CEPH', 'CBCT', and 'CAM'. Below these, patient information is shown: 'Date of the image: 06/2017', 'Patient's ID: 918', and 'Date of birth: 06/1981'. The main area features a panoramic X-ray of a patient's teeth. Three teeth are highlighted with red circles and labeled: 16, 16, and 27. A circular inset provides a magnified view of the tooth labeled 27. On the right side, there is a legend for tooth numbers (18-38) and a list of analysis results:

16	Caries	35%	
	Air Bubbles	35%	<input type="checkbox"/>
	External Resorption	20%	<input type="checkbox"/>
16	Caries	85%	<input checked="" type="checkbox"/>
27	Periodontitis	95%	<input type="checkbox"/>
	Caries	75%	<input type="checkbox"/>

At the bottom of the interface, there are navigation buttons: 'Reset', '1 of 4', 'Prev', 'Next', 'ANALYZE', and 'REPORT'. A 'Back' button is also visible in the bottom left corner of the overall page.
